Volvo CE Unveils Electric Compact Excavator and Wheel Loader at bauma

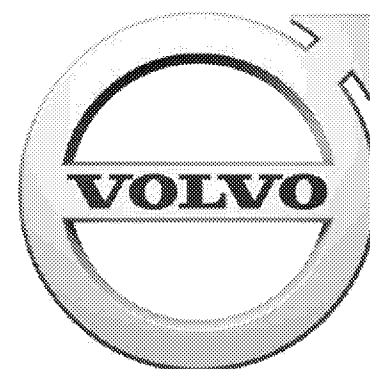

Volvo Construction Equipment has unveiled the ECR25 excavator and L25 wheel loader from its new range of electric compact machines.

April 10, 2019 | From Volvo Construction Equipment

The electric L25.

Volvo Construction Equipment (Volvo CE) is delivering on its commitment of 'Building Tomorrow' with the unveiling of its first commercial zero-emissions electric compact excavator and wheel loader at bauma Munich. The machines, which are the first to be shown from a new electric range of Volvo branded compact excavators and compact wheel loaders, deliver zero exhaust emissions, significantly lower noise levels, reduced energy costs, improved efficiency and less maintenance requirements, compared to their conventional counterparts. From mid-2020, Volvo CE will begin to launch its range of electric compact excavators (EC15 to EC27) and wheel loaders (L20 to L28), stopping new diesel engine-based development of these models.
