David,

Good news, no chicken scratches! Attached please find the spreadsheet used to calculate the proposed 276,294 gpd. Have a great weekend!

Subject: Inglewood Basketball & Entertainment Center: Wastewater Generation

Hello Adriana,

Item 4, the total of 276,794 gpd is what I need help in showing our response to comments. Item 2 shows the existing 8,955 gpd which appears to be used to derive the 276,794 gpd. My contact information is shown below...

2. **Table 3.15-13, page 3.15-50, Estimated Existing Wastewater Generation at the Project Site – Based on the District’s records, the existing wastewater generation at the project site is 8,955 gallons per day.**

4. **Table 3.15-15, page 3.15-56, Estimated Proposed Project Wastewater Generation and Sewer Capacity Summary – Based on the Districts’ average wastewater generation factors, the expected increase in average wastewater flow from the project site, as described in Table 3.15-15 is 276,794 gallons per day, after the structures on the project site are demolished.**

Thank you very much for your help.

Dave Beauchamp
