Ok – I’m trying to avoid the issues we are facing with the stadium with the arena. So let me know what things you may need that relate to infrastructure improvements or within the command room.

FYI – I did get the arena to commit to installing conduit from a hub into the arena.

Ok. Haha (I’m not surprised)

Is it your anticipation that PD will have a command room at the arena? Which would be with FD, Public Works, and the internal arena security.,

Jeff – have you been in any talks, planning, or anything to that matter in relation to the Clippers Arena in respect to the Command Room and fiber entering the arena?
