subject LA County Fire Department Funding and Review  
action required

The City of Inglewood contracts with the LACFD for fire protection services. Through that contract, the City provides funding to the District for services. Contract terms are negotiated between the City of Inglewood and the LACFD. A history of contract amounts between the City and the LACFD demonstrate an increase in contract value over the past few years. Review the City's budget for actual amounts. The City uses General Plan funds to pay for the LACFD contract.

New construction is subject to LACFD review, and life safety approval needs to be granted. This is standard practice. Review of project plans and approval by the LACFD occurs prior to building permit approval.
