

PART 3: SEC INFRASTRUCTURE PLAN

Section 1 SEC Infrastructure Plan Overview

1.1 SEC Infrastructure Plan

This SEC Infrastructure Plan will govern the construction and development of infrastructure for the Project in accordance with the other Project Approvals, including the SEC Design Guidelines. Except as provided in the SEC Design Guidelines and as agreed to by the City and Developer, no on site or off site Infrastructure Improvements ("Infrastructure") beyond what is described herein, and such other Infrastructure as may be mutually agreed to by the City and Developer, will be required for development of the Project or will be constructed by the Developer.

This SEC Infrastructure Plan describes all Infrastructure improvements to be provided by Developer, at Developer's cost, in accordance herewith for the Project. While some Infrastructure improvements to be provided by City Agencies or other governmental agencies, may be described, their inclusion herein is not intended to be all inclusive of all Infrastructure improvements to be provided by City Agencies or other governmental agencies. A condition precedent to Developer's performance under this SEC Infrastructure Plan is the obtaining of all requisite approvals.

This SEC Infrastructure Plan establishes the design standards, construction standards, criteria and specifications of Infrastructure for the Project, including, without limitation, streets, and Infrastructure within the street right of way or easements including storm water, sanitary sewers, domestic water, reclaimed water, and all other Infrastructure. The precise location and final design of Infrastructure improvements consistent with this SEC Infrastructure Plan including intersection, street segment, wet and dry utilities, and other Infrastructure improvements will be determined during plan check and permit processing.

The dedication, acquisition and acceptance of streets and other Infrastructure improvements will occur through separate improvement plans and permits, parcel and tract maps, offers of dedication and easements. Other than as provided in the DDA, no real property is required to be acquired to construct the Infrastructure described in this SEC Infrastructure Plan.

The ability to construct and dedicate Infrastructure improvements for acquisition and acceptance by other regulatory agencies with jurisdiction such as, as applicable, Cal Trans, the City of Los Angeles, the County of Los Angeles or the City of Hawthorne, is contingent upon the review and approval of those other regulatory agencies. City will, in accordance with the Development Agreement, reasonably cooperate with requests by Developer to assist in obtaining such regulatory approvals, permits and actions from such other agencies that are necessary or desirable to effectuate and implement development of Project Infrastructure.

City will not require performance or payment bonds or other security for the completion of the Infrastructure improvements other than the typical general contractor bonds or contractor parent company guarantees.

Section 2 Wet Utilities

Developer will install new storm drains, sanitary sewers, fire protection water main, domestic water mains, reclaimed water mains where needed and a well water transmission main. Construction will be done per approved plans and specifications prepared by the Developer's Project civil engineer and in a manner acceptable to the Developer and City and other Agencies having jurisdiction.

2.1 Sanitary Sewer

The Project's sanitary sewer system will be a combination of new public sewers to be installed in existing public right-of-way and new private on-site sewers as shown on Exhibit 1 (Sewer Infrastructure Plan). Developer's Project civil engineer will prepare plans and specifications for the work that shall be reviewed and approved by the City. The Department of Public Works will plan check and inspect the Infrastructure work in the public right of way and the Building Safety Division will plan check and inspect the onsite private work. Developer will provide public right-of-way traffic control plans to the City for approval. After approval of the plans and specifications and the payment of standard City fees, the City of Inglewood will cooperate with the Developer to provide encroachment permits to allow the installation of the Project's sewer Infrastructure without restrictions based on the age of the existing pavement in the public streets. The City of Inglewood will provide adequate inspection services to allow the work to proceed without delay. Developer and its contractors shall comply with the NPDES General Construction Permit, City Laws including Public Works Department Requirements for Public Works Permit.

Where sewer mains and laterals will be installed in the public rights-of-way, existing asphalt pavement will be removed and replaced per City Standard DS-12. The Project's sanitary sewer Infrastructure will tie into existing public sewer lines at six points unless revisions are requested by the Developer and approved by the City. The West Parking garage will be connected to the sewer main in South Prairie Avenue at West 102nd Street. The Arena area will be connected to existing sewer mains at two points: (1) Freeman Avenue and West 103rd Street and (2) West 102nd Street and East Boundary of Arena area. The Plaza area will be connected at South Prairie Avenue and 102nd Street. The East Parking Garage will be connected to a main in West Century Boulevard. Connection shall be per approved sewer study, typical of all installations and connections.

The existing sewer mains in the portions of West 101st Street and West 102nd Street right-of-way to be vacated for the Project will be removed and new terminal manholes will be installed at the ends of the mains that will remain in service.

New offsite sewer mains will be installed in the existing public rights-of-way in locations shown on Exhibit 1 (Sewer Infrastructure Plan) and will be owned, operated and maintained by the City of Inglewood. New onsite sewer mains and service laterals will be installed in locations shown on Exhibit 1 (Sewer Infrastructure Plan) and will be owned, operated and maintained by the Developer. The sewer Infrastructure will consist of PVC sewer pipes ranging in diameter from 4" to 12" as well as precast manholes, and cleanouts, wyes, connections to existing mains and other appurtenances designed by the Project Civil Engineer in final plans to be approved by the City.

The sewer connection for the Hotel to be relocated on West Century Boulevard east of the East Parking Garage site would have a new connection to the sewer main in West 102nd Street east of South Doty Avenue, and it will require an easement through the Developer's East Parking Garage site. This hotel

sewer will be installed by the Hotel developer under separate sewer plans, traffic control plans and permits to be obtained provided by the Hotel developer, and it is not part of this SEC Infrastructure Plan.

2.2 Storm Drainage

The Project's storm drain Infrastructure will consist of tying into existing public storm drain lines, removing and relocating storm drain lines, and construction of new drain lines and supporting structures as shown on Exhibit 2 (Storm Drain Infrastructure Plan). Developer's Project Civil Engineer will prepare plans and specifications for the work that shall be reviewed and approved by the City Department of Public Works and/or Building Department. Developer will provide traffic control plans to the City for approval of work in existing public right-of-way. After approval of the plans and specifications and the payment of standard City fees, the City will cooperate with the Developer to provide encroachment permits to allow the installation of the Project's storm drain Infrastructure without restrictions based on the age of the existing pavement in the public streets. The City of Inglewood will provide adequate inspection services to allow the work to proceed without delay. Developer and its contractors shall comply with the City Laws, the Public Works Department Requirements for Public Works Permit, MS4 permit regulations, and the NPDES General Construction Permit. A SWPPP shall be prepared to the satisfaction of the City and the Los Angeles Regional Water Quality Control Board ("RWQCB") to ensure the prevention of substantial water quality degradation during construction of the Proposed Project. These plans shall be approved by the City and the Los Angeles RWQCB to confirm that these permit and regulatory requirements have been satisfied before construction commences on the site. Where storm drain Infrastructure will be installed in the public rights-of-way, existing asphalt pavement will be removed and replaced per City Standard DS-12.

The Project's storm drain system will tie into existing public storm drain lines at six points, unless revisions are requested by the Developer and approved by the City. The West Parking Garage area will be connected to existing public storm drain lines at three points: (1) West 101st Street approximately 57' west of the project boundary, (2) an existing public catch basin at the northwest corner of South Prairie Avenue and West 101st Street, (3) an existing public catch basin at the northwest corner of South Prairie Avenue and West 102nd Street. The Arena and Plaza areas will be connected to an existing public storm drain at Prairie and the southern access road just north of West 103rd street. The City relocated well site will be connected to an existing public reinforced concrete box storm drain at the intersection of West 102nd Street and South Doty Avenue. The East Parking Garage site will be connected to an existing public storm drain that traverses West 102nd Street approximately 230' east of the centerline of South Doty Avenue.

New offsite 18" and 24" reinforced concrete storm drains and precast manholes will be installed in the existing public rights-of-way in locations shown on Exhibit 2 (Storm Drain Infrastructure Plan) and will be owned, operated and maintained by the City. With the exception of the new Well Site, new onsite storm drains ranging from 8" to 24" diameter shall be HDPE WT Pipe by ADS or approved equal and installed and tested per Public Works Green Book standard. The Well Site storm drain will be reinforced concrete and will be owned, operated, and maintained by the City. All other on-site storm drain mains, service laterals and appurtenances will be installed in locations shown on Exhibit 2 (Storm Drain Infrastructure Plan) and will be owned, operated and maintained by the Developer.

To meet City-wide NPDS and MS4 permit requirements, Developer will install bio filtration systems in landscaped areas throughout the Project site. Bio filtration features will implement best management

practices (BMPs) and will include features such as bio filtration planters and bio swales, and proprietary devices. The proposed bio filtration systems will be designed to capture site runoff from roof drains and surface runoff, treat the runoff through biological reactions within the planter soil media. Underground pre-cast detention basin pretreatment structures will be constructed in the West Parking area, Arena Site and Arena Site Parking Structure, East Parking Garage Site as shown on [Exhibit 2](#) (Storm Drain Infrastructure Plan) to lower peak flow rates to LA County approved allowable levels.

Storm Drain Improvements, bio filtration systems and detention basin pretreatment structures for the Hotel to be relocated on West Century Boulevard east of the East Parking Garage Site would require an easement to be provided by Developer through the Developer's East Parking Garage Site. These improvements are not part of this SEC Infrastructure Plan. The Hotel developer will be responsible for obtaining permits and constructing the storm drain improvements for the hotel site, including separate storm drain plans, traffic control plans and other permits.

2.3 Fire Protection Infrastructure

The Project's fire protection system will be a combination of new public water mains and fire hydrants to be installed in existing public right-of-way and new private on-site water mains and fire hydrants installed on site as shown on [Exhibit 3](#) (Fire Protection Infrastructure Plan). Developer's Project civil engineer will prepare plans and specifications for the work that shall be reviewed and approved by the Golden State Water Company and City Department of Public Works and/or Building Department. Developer will provide traffic control plans to the City for approval of work in existing public right-of-way. After approval of the plans and specifications and the payment of standard City fees, the City of Inglewood will cooperate with the Developer to provide encroachment permits to allow the installation of the Project's fire protection infrastructure without restrictions based on the age of the existing pavement in the public streets. The Golden State Water District, where applicable, will inspect the installation of the water mains and appurtenances in the public right-of-way including the water meters and the City will inspect pavement repairs. The Inglewood Building Safety Division will inspect on site work. Developer and their contractors shall comply with the NPDES General Construction Permit, Inglewood Municipal Code regulations, and the Public Works Department Requirements for Public Works Permit.

Where fire protection water mains and appurtenances will be installed in the public rights-of-way, existing asphalt pavement will be removed and replaced per the Standard Plans for Public Works Construction Standard Plan 133-3.

The Project's fire protection infrastructure will tie into existing public water mains at nine points. Two new fire hydrants will connect to the Golden State Water Company (GSWC) water main on the west site of Prairie Avenue and will be extended to the east side of the street. Two connections will be made to the GSWC water main at West 101st Street on the west side of the West Parking Garage Site and private mains will be extended north and south to new private fire hydrants. The southern main will extend to West 102nd Street and tie into an existing water main there. Two new fire water mains will connect to the GSWC water main on the west site of South Prairie Avenue and will be extended across the street. A new public fire hydrant will be installed on the east side of South Prairie Avenue just south of West 101st Street. Two private fire water mains will be extended into the Arena and Plaza areas to form a loop around the new arena complex. This private main will feed private fire hydrants. A fire protection

water main and private fire hydrant on the west side of the East Parking Garage will connect to the GSWC water main in West Century Boulevard.

The fire protection water main for the Hotel to be relocated on West Century Boulevard east of the East Parking Garage Site will be installed by the Hotel developer under separate sewer plans, traffic control plans and permits to be obtained provided by the Hotel developer, and it is not part of this SEC Infrastructure Plan.

2.4 Domestic Water Infrastructure

The Project's domestic water system will be a combination of new public water mains and appurtenances to be installed in existing public right-of-way and new private on-site water mains and appurtenances installed on site as shown on Exhibit 4 (Domestic Water Infrastructure Plan). Developer's Project civil engineer will prepare plans and specifications for the work that shall be reviewed and approved by the Golden State Water Company (GSWC) and City of Inglewood Department of Public Works and/or Building Department. Developer will provide traffic control plans to the City for approval of work in existing public right-of-way. After approval of the plans and specifications and the payment of standard City fees, the City will cooperate with the Developer to provide encroachment permits to allow the installation of the Project's domestic water Infrastructure without restrictions based on the age of the existing pavement in the public streets. GSWD will inspect the installation of the water mains and appurtenances in public right-of-way to the meter and the City of Inglewood will inspect pavement repairs. The Inglewood Building Safety Division will inspect the on-site private water mains and appurtenances. Developer and their contractors shall comply with the NPDES General Construction Permit, Inglewood Municipal Code regulations, and the Public Works Department Requirements for Public Works Permit.

The existing domestic water mains in the portions of West 101st Street and West 102nd Street rights-of-way to be vacated for the Project will be removed and the remaining ends of the mains that will remain in service will be capped.

Where domestic water mains and appurtenances will be installed in the public rights-of-way, existing asphalt pavement will be removed and replaced per the Standard Plans for Public Works Construction Standard Plan 133-3.

The Project's domestic water infrastructure will tie into existing public water mains at seven points. The West Parking Garage Site will connect to the existing GSWC water main in West 101st Street with a 2-inch service with backflow preventer and meter. Three new domestic water mains will connect to the GSWC water main on the west side of South Prairie Avenue and will be extended across the street to backflow preventers. The two connections on the north side of Prairie Avenue will loop through the Plaza Area to service plaza buildings. The connection to the south will loop through the southern access road and connect to the existing main at West 102nd Street and the eastern Arena area boundary with a backflow preventer. This main will service the arena complex. The East Parking Garage Site will connect to an existing GSWC water main in West Century Boulevard with a domestic water service, back flow preventer, and meter on the west side of the site.

A domestic water service back flow preventer and meter for the Hotel to be relocated on West Century Boulevard east of the East Parking Garage Site will be installed by the Hotel developer under separate

sewer plans, traffic control plans and permits to be obtained provided by the Hotel developer, and it is not part of this SEC Infrastructure Plan.

2.5 Well Water Transmission Main Infrastructure

The City's 27" diameter water well transmission main in the portion of the West 102nd Street right-of-way to be vacated for the Project will be removed and a new pipeline will be installed in an on-site easement in the Arena southern access road and then northerly along South Prairie Avenue to the reconnect to the existing main in West 102nd Street as shown on [Exhibit 5](#) (Well Water Transmission Infrastructure Plan). The new main will be installed and connected with the least interruption to service as practical. The new main will be in operation prior to the demolition of the existing main.

Developer's Project civil engineer will prepare plans and specifications for the work that shall be reviewed and approved by the City Department of Public Works. Developer will provide traffic control plans to the City for approval of work in existing public right-of-way. After approval of the plans and specifications and the payment of standard City fees, the City of Inglewood will cooperate with the Developer to provide encroachment permits to allow the installation of the work without restrictions based on the age of the existing pavement in the public streets. Developer and their contractors shall comply with the NPDES General Construction Permit, City Laws, and the Public Works Department Requirements for Public Works Permit.

Where the well water transmission main will be installed in the public right-of-way, existing asphalt pavement will be removed and replaced per City Standard DS-12 .

2.6 Reclaimed Water System

The Project's reclaimed water infrastructure shown on [Exhibit 6](#) (Reclaimed Water Infrastructure Plan) will consist of a 2" connection to the existing West Basin Municipal Water District (WBMWD) transmission main on the east side of South Prairie Avenue across from West 101st Street. The connection will be fitted with the required backflow preventer and meter. Onsite private reclaimed water mains will be installed in the Arena area and Plaza area and may be connected to the West Parking Garage Site area via the pedestrian bridge.

Developer's Project civil engineer will prepare plans and specifications for the work that shall be reviewed and approved by the WBMWD, City Public Works and/or Building Department, and the Los Angeles County Health Department. Developer will provide traffic control plans to the City for approval of work in existing public right-of-way. After approval of the plans and specifications and the payment of standard City fees, the City of Inglewood will cooperate with the Developer to provide encroachment permits to allow the installation of the Project's reclaimed water infrastructure without restrictions based on the age of the existing pavement in the public streets. WBMWD will inspect the installation of the water mains and appurtenances in public right-of-way to the meter and the City of Inglewood will inspect pavement repairs. The Inglewood Building Safety Division will inspect the on-site private water mains and appurtenances. Developer and their contractors shall comply with the NPDES General Construction Permit, City Laws, and the Public Works Department Requirements for Public Works Permit.

Where reclaimed water mains and appurtenances will be installed in the public rights-of-way, existing asphalt pavement will be removed and replaced per City Standard DS-12.

Section 3 Dry Utilities

Dry Utility improvements including onsite and offsite electrical, natural gas, telephone, and cable T.V. utilities are identified on Exhibit 7 (Dry Utility Infrastructure Plan). Southern California Edison is the electricity provider, Southern California Gas Co provides natural gas, AT&T provide phone service and Spectrum Business is the primary cable provider. Work necessary to provide the joint trench for dry utilities (that lie in public streets and in the sidewalk area if at all possible) and onsite access roads, consists of trench excavation and installation of conduit ducts for telephone, cable, fiber optic, electrical, and gas (direct burial). Additionally, utility vaults, splice boxes, and backfill are included. The utility owner/franchisee (such as optic companies) will be responsible for installing facilities such as transformers and wire.

All necessary and properly authorized public utility improvements for which franchises are authorized by the City shall be designed and installed in the public right-of-way in accordance with City Laws in effect from time to time, and permits approved by City Public Works Department. Joint trenches or utility corridors will be utilized wherever feasible. The location and design of joint trenches/utility corridors in the right of way must be approved by City Public Works Department during the preparation of improvement plans.

3.1 Relocations to Maintain Existing Service

The dry utilities in the portions of West 101st Street and West 102nd Street Right-of-Way to be vacated for the Project will be removed. The dry utilities located in easements on the Project sites will be removed. Buildings to remain that take service from these utilities to be removed include:

- (A) Liquor Warehouse Market, 10025 S Prairie Ave, Inglewood, CA 90303: Electricity, Gas, Telephone, Cable T.V.
- (B) Sunshine Coin Laundry, 10023 S Prairie Ave, Inglewood, CA 90303: Electricity, Gas, Telephone, Cable T.V.
- (C) Single Family Detached Residence, 10226 S. Prairie Avenue, Inglewood, CA 90303: Telephone, Cable T.V.
- (D) Triplex Residence, 10204 S. Prairie Avenue, Inglewood, CA 90303: Telephone, Cable T.V.
- (E) Airport Inn Hotel, 3900 W. Century Boulevard, Inglewood, CA 90303: Telephone, Cable T.V.
- (F) Extra Space Storage, 3846 W. Century Boulevard, Inglewood, CA 90303: Telephone, Cable T.V.
- (G) Industrial Buildings, 3821 102nd Street, Inglewood, CA 90303 and properties to the east: Electricity.
- (H) Industrial Building, 10105 Doty Avenue, Inglewood, CA 90303: Telephone & Cable T.V.

Prior to disconnection of these active dry utilities to these users, new utilities to maintain service will be installed. Underground dry utilities will be installed in the public right-of-way in South Prairie Avenue, West 101st Street, West Century Boulevard, West 102nd Street, West 103rd Street, West 104th Street and the access road on the west side of the West Parking Garage Site. Above grade utilities will be installed on pole lines in West 104th Street, South Doty Avenue, and West 102nd Street. Underground dry utilities

will be installed in an easement on the Plaza area north access road to connect to the pole line at the southwest corner of the Airport Inn Hotel Property to utilities in West Century Boulevard. Underground dry utilities will be installed in an easement on the western north/south access road on the West Parking Garage Site to connect West 101st Street electrical service to West Century Boulevard. Plans will be submitted for City review prior to installation of utilities.

3.2 New Dry Utility Services

New dry utility electrical, telephone and cable TV service to the West Parking Garage Site will be taken from the existing overhead pole line on the north side of West 102nd Street.

New electrical service to the Arena Plaza areas will be from underground dry utilities that will be extended from the CE Lennox Substation on West 103rd Street, across South Prairie Avenue and extended in an easement on the Arena area south access road. A secondary electrical service will be extended from the Hawthorne Substation in a combination of above ground and underground facilities northerly along South Prairie Avenue to the easement on the Arena area south access road. New natural gas, telephone, and cable TV service to the Arena and Plaza areas will extend from existing facilities at South Prairie Avenue and will be extended in a joint trench along the southern access road. New onsite dry utility facilities would be terminated within a utility yard near the southeast corner of the Arena Site. Structures required to serve the Project site consist of switches, capacitor banks, multiple transformers, and metering equipment.

New dry utility service to the new relocated well site will be from the existing overhead pole line on West 102nd Street.

New dry utility service to the East Parking Garage will be from the existing overhead pole line on the north side of West 102nd Street and will require an underground service to be installed across West 102nd Street.

Dry utilities for the Hotel to be relocated on West Century Boulevard east of the East Parking Garage site will be installed by the Hotel developer under separate plans, traffic control plans and permits to be obtained by the Hotel developer, and it is not part of this SEC Infrastructure Plan. Plans will be submitted to, reviewed by, and approved by the City.

Section 4 Inglewood Water Well Relocation

The City owned and operated Inglewood Water Well No. 6 will be properly destroyed or properly abandoned, and a new Water Well No. 8 will be constructed to replace it as detailed in the City of Inglewood Well No. 8 Preliminary Design Report prepared by Tetra Tech and dated April 2018 ("Well Relocation PDR"). The new City owned, and operated Water Well No. 8 will be located on the southern third of the two parcel Well Relocation Site at 3818 West 102nd Street in Inglewood. The site plan for Well No. 8 is shown on [Exhibit 8](#) (New Inglewood Well 8 Plan).

The well will include water pumps and associated infrastructure that would be visible above ground, similar to the existing Water Well No. 6. No buildings are proposed. The ground surface would be covered with gravel or crushed stone, with a 15-foot wide paved driveway adjacent to the eastern side of the proposed well location for vehicle access.

A 6-foot tall concrete masonry unit security fence with automated sliding access gate would enclose the well site, with additional security provided via security cameras connected to the City of Inglewood via the pump station telemetry system. The well site will not include a permanent onsite backup generator.

The well would be drilled approximately 750 feet below ground surface, with a submersible pump to reduce noise to nearby residences. The Well No. 8 raw water discharge piping would connect to the existing City of Inglewood raw water main, located immediately in front of the proposed site on West 102nd Street, as shown on [Exhibit 5](#) (Well Water Transmission Infrastructure Plan). An existing utility pole located 50 feet east of the Well Relocation Site on West 102nd Street is expected to be the connection location to provide the power for the new well facility.

An 18" diameter reinforced concrete well waste discharge line will connect to a LA County Flood Control District (LACFCD) reinforced concrete box located at the intersection of West 102nd Street and South Doty Avenue.

Inglewood Well No. 6 will be properly removed as described in the Well Relocation PDR. Existing site improvements will be demolished and removed as shown on [Exhibit 9](#) (Inglewood Well 6 Demolition Plan).

With the City of Inglewood's concurrence, Developer hired Tetra Tech as engineer of record for this well demolition and new well relocation project to provide services including project management, preliminary design, permitting, well design & equipping construction documents, bid phase assistance, and construction phase assistance for both removal of existing well and construction of a new replacement well.

The City of Inglewood will review and approve the plans and specifications and will bid out the work and hire the contractors to complete the Destruction of Well No. 6 and the construction of Well No. 8 and all required associated infrastructure and facilities. Developer will help coordinate plan reviews and permits and will pay for the construction work contracted for by the City subject to a separate reimbursement agreement to be negotiated. The City will destroy Well No. 6 per CA Water Well Standards Bulletins 74-81 and 74-90, end electric power service to the lot, and close the valve that cuts the well off from the well water transmission main. City may remove/salvage whatever Well No. 6 superstructure they deem appropriate.

Developer will contract for and complete the demolition of the facilities and infrastructure at Well No. 6 that remain after the City destroys the well. This demolition work by Developer can start as soon as Developer acquires the Well No. 6 site property from the City. City does not require new Well No. 8 to be complete prior to the destruction of Well No. 6.

Section 5 Street Improvements

Substantial street infrastructure already exists which will serve the Project. The existing and proposed street systems for the Project are shown in Exhibit 10 (Circulation Plan, Traffic Signal and Bus Stop Plan) and in Exhibit 11 (Street Vacation, Widening and Dedication Plan). Basic geometrics in the right of way such as numbers of lanes, their uses, and their widths are further shown in Street Section Exhibits 12a, 12b, and 12c. The following Infrastructure descriptions apply generally to streets surrounding the Project. In general, new street structural sections consist of 6" asphalt concrete (AC) over 9" crushed aggregate base (AB) for a traffic index (TI) of 7-8 and 5" AC over 8" AB for a TI 6-7 per soils report recommendations, to meet and match existing streets. Crushed miscellaneous base (CAB) could be substituted if approved by the Soils Engineer of Record. All street structural sections shall meet City standards in effect from at the time of plan approval. All anticipated underground utility crossings will be installed prior to final street pavement. Street improvements will be designed to meet the current City of Inglewood standard plans and details. Existing fiber optic conduits will be avoided or relocated as necessary. Street trees and landscape improvements in the public right of way will be provided in accordance with the SEC Design Guidelines.

5.1 Local Public Street Right-Of-Way Surface Improvements

Public street surface improvements are not required except as specifically set forth in this Infrastructure Plan. Prior to the start of the Project, Developer will photograph the existing condition of the streets surrounding the Project site including West 102nd Street, West 101st Street, West Century Boulevard, South Prairie Avenue, and South Doty Avenue and will only be required to repair street improvements shown to be damaged by the development of the Project and Infrastructure. New street surface improvements to support the Project will consist of:

- (A) North side of 102nd Street west of South Prairie Avenue: Demolition and replacement of existing curbs, gutters, and sidewalks from Prairie Avenue to the western Project Boundary that is approximately 528 feet west of the intersections of the centerlines of West 102nd Street and South Prairie Avenue. Work includes adding a new concrete curb returns and asphalt surface improvements to join the new 28-foot-wide fire access road on the west side of the West Parking Garage to West 102nd Street. Slurry seal both sides of West 102nd Street from the western Project Boundary to the intersection of West 102nd Street and South Prairie Avenue. Install new parkway street trees and landscaping along the frontage of the project per Section A1 102nd Street West Parking Garage on Exhibit 12b (Street Sections).
- (B) West 101st Street 15 feet west of West Parking Garage Site western boundary: Demolition of existing curbs, gutters, and sidewalks and adding a new concrete curb returns and asphalt surface improvements to join the new 28-foot-wide fire access road on the west side of the West Parking Garage to West 101st Street.
- (C) West 101st Street from the intersection of the centerlines of West 101st Street and South Prairie Avenue west approximately 200 feet: On the south side of West 101st Street, demolish and replace existing curbs, gutters, and sidewalks and adding a new concrete curb returns and asphalt surface improvements to join the new 28-foot-wide fire access road on the east side of the West Parking Garage. Grind and overlay the north and

south sides of the remaining portion of West 101st Street in this area with asphalt. Restripe the stop sign and bar at the intersection with South Prairie Avenue.

- (D) South side of West Century Boulevard west of South Prairie Avenue: (1) Approximately 519 feet west of the intersection of the centerlines of West Century Boulevard and South Prairie Avenue, demolish 34 feet of existing curbs, gutters, and sidewalks and add a new concrete curb returns and asphalt surface improvements to join the new 28-foot-wide fire access road on the east and west sides of the West Parking Garage. Demolition of existing curbs, gutters, and sidewalks and installation of a new concrete driveway to access the West Parking Garage. (2) Approximately 220 feet west of the intersection of the centerlines of West Century Boulevard and South Prairie Avenue, demolish 34 feet of existing curbs, gutters, and sidewalk and add new concrete curb returns and asphalt surface improvements to join the new 28-foot-wide fire access road on the east side of the West Parking Garage. (3) Approximately 452 feet west of the intersection of the centerlines of West Century Boulevard and South Prairie Avenue, demolish 48 feet of existing curbs, gutters, and sidewalk and add a new concrete driveway to join the northwest entry and exit to the Western Parking Structure. Install a new traffic signal at the northwest access to the West Parking Garage including new electrical service from Southern California Edison. Install new signage and striping of West Century Boulevard at this new intersection where needed for new access points per final approved plans. Temporary relocation of existing a Metro bus stop sign, bench and trash can.
- (E) West side of South Prairie Avenue south of West 101st Street to the north side of West 102nd Street: Demolition of existing curbs, gutters, sidewalks and three streetlights. Add one new 12' wide AC right turn only lane and construction new concrete curbs, gutters and sidewalks as shown in Section P2 in [Exhibit 12b](#) (Street Sections). Install new signage and striping of the new lane per final approved plans. Tie into existing streetlight wiring conduits and reinstall the three streetlights with new foundations. Provide a concrete driveway access to the east side of the West Parking Garage. Install a new traffic signal at the West Parking Garage access including new electrical service from Southern California Edison. Install new signage on and striping of South Prairie Avenue at this new intersection per final approved plans. Replace existing City street trees in kind.
- (F) Northwest corner of South Prairie Avenue at West 102nd Street: Close off access west bound on West 102nd Street from south bound South Prairie Avenue as shown on the detail entitled Prairie Avenue and West 102nd Street West Parking Structure on [Exhibit 12c](#) (Street Sections). Demolish the existing traffic signal at this intersection. Install signage and striping of this intersection per final approved plans.
- (G) South Prairie Avenue between West 102nd Street and West 103rd Street: If the location of the reversible lane signal that crosses South Prairie Avenue overhead is in conflict with an access driveway to the Project, remove and, if feasible, relocate (or if damaged by Developer in the course of removal, replace), the existing reversible lane gantry to a nearby location within the existing City reversible lane system. Work would include new concrete foundations and tying into the existing reversible lane wiring system.

- (H) East side of South Prairie Avenue along the frontage of the Project south of West 102nd Street to the Project Boundary: Demolish existing and install new curbs, gutters, and sidewalks. Install new concrete curb returns and asphalt surface improvements to join the new 12-foot-wide access road to the South Parking Garage that will be approximately 167 feet south of the intersection of the centerlines of South Prairie Avenue and West 102nd Street. Install new concrete curb returns and asphalt surface improvements to join the new 28-foot-wide access road to the South Parking Garage that will be approximately 227 feet south of the intersection of the centerlines of South Prairie Avenue and West 102nd Street. Relocate one streetlight. Tie into existing streetlight wiring conduits and reinstall the existing streetlight with new foundations.
- (I) East side of South Prairie Avenue between West 102nd Street and West Century Boulevard: Demolition of existing curbs, gutters, sidewalks and three streetlights. Add one new 12' wide AC right turn only lane and construction new concrete curbs, gutters and sidewalks as shown in Section P2 in Exhibit 12b (Street Sections). Extend the south leg crosswalk striping across South Prairie Avenue to the new southeast corner. Tie into existing streetlight wiring conduits and reinstall three streetlights with new foundations. Modify the existing traffic signal at West Century Boulevard and South Prairie Avenue to implement a northbound right-turn signal overlap phase. Install new signage and striping of South Prairie Avenue per final approved plans. Remove the existing bus stop signs, benches, trash can and shelter. Adjust the east leg crosswalk across West Century Boulevard to the new southeast corner and widen it to 20'. Replace existing City street trees in kind.
- (J) East side of South Prairie Avenue north of West Century Boulevard: Remove existing parkway landscape, install sidewalk and reinstall the bus stop signs, benches, trash can and shelter from the south side of West Century Boulevard to the north side of the intersection as shown on Exhibit 10 (Circulation Plan, Traffic Signal and Bus Stop Plan). Remove the existing AC in the street and install a new concrete bus pad per City of Inglewood Standard Plan DS-14.
- (K) South side of West Century Boulevard between South Prairie Avenue to South Doty Avenue: (1) Relocate the existing bus stop sign, shelter, benches, and trash can east as shown on Exhibit 10 (Circulation Plan, Traffic Signal and Bus Stop Plan). Remove the existing AC in the street and install a new concrete bus pad per City of Inglewood Standard Plan DS-14. (2) Approximately 407 feet east of the intersection of the centerlines of West Century Boulevard and South Prairie Avenue, demolish approximately 41 feet of existing curbs, gutters, and sidewalks and add a new concrete curb returns and asphalt surface improvements to join the new 28-foot-wide fire access road to the east of the Plaza and to join the access ramp to the new Arena underground event floor level. Relocate one streetlight to create room for the new fire access road to the east of the Sports and Entertainment Complex plaza.
- (L) South side of West Century Boulevard along the East Parking Garage site frontage: (1) Demolish existing curbs, gutters, and sidewalks where needed and add a new concrete curb returns and asphalt surface improvements to join the new fire access road to the west side of the East Parking Garage. (2) Demolish existing curbs, gutters, and sidewalks and add new concrete curb returns and asphalt surface treatments to join the

new East Parking Garage ingress and egress points. Modify the traffic signal, median and striping at the entrance to the East Parking Garage to allow for eastbound and westbound turning movements.

- (M) North side of West 102nd Street along the East Parking Garage site frontage: Demolish and replace existing curbs, gutters, and sidewalks and add a new concrete curb return and asphalt surface improvements to join the new access road to the south side of the East Parking Garage. Install new parkway landscape and street trees along the frontage of the lot.
- (N) North side of West 102nd Street approximately 213 feet west of the intersection of South Doty Avenue and West 102nd Street: Install a LA County Fire Department approved hammer-head turn around. This will require removing curb, gutter and sidewalk and installing new curb returns, sidewalk and asphalt surface improvements.
- (O) Install a conduit and fiber optic cable to provide a direct connection from the City ITS hub at the northwest corner of the intersection of West Century Boulevard and South Prairie Avenue to the main distribution frame within the Sports and Entertainment Complex site for use by the City of Inglewood Public Works Department and the City of Inglewood Police Department.
- (P) The Hotel to be constructed on West Century Boulevard east of the East Parking Garage site will require demolition of the existing curbs, gutters, and sidewalks where needed, and the addition of a new driveway to the Hotel on West Century Boulevard. These improvements will be installed by the Hotel developer under separate plans, traffic control plans and permits to be obtained provided by the Hotel Developer, and it is not part of this SEC Infrastructure Plan.

5.2 Mitigation Measures Including Intersections, Traffic Signal Improvements and Freeway Improvements in the City of Inglewood and in Other Jurisdictions

The following specific intersection, traffic signal and freeway Infrastructure improvements shall, subject to obtaining consents of other regulatory agencies with jurisdiction, where applicable, such as the City of Los Angeles, City of Hawthorne or Caltrans, be provided by Developer in accordance with the Section 3.14 Transportation and Circulation Mitigation Measures as described of the IBEC MMRP, including the schedule and conditions for performance described in the MMRP. In the event of a conflict or omission between the description of the Infrastructure improvements described in this Section 5.2 and the IBEC MMRP the IBEC MMRP shall control.

- (A) As shown on Exhibit 13a, work with the City of Inglewood and the City of Los Angeles to implement capacity-increasing improvements at the West Century Boulevard/South La Cienega Boulevard intersection. Recommended improvements include two elements: (i) Restripe the westbound approach and modify traffic signals to convert the outside through/right lane to a dedicated right-turn lane and operate it with an overlap phase consistent with the LAX Landside Modernization Program [LAMP] improvements planned for this location; and (ii) Remove median island on the west leg, restripe the

eastbound and westbound approaches, and modify traffic signals to add second left-turn lanes in each direction. . If infeasible work with the City of Inglewood and LADOT to identify a substitute measure or contribution in accordance with the IBEC MMRP for MM 3.14-2(c).

- (B) As shown on Exhibit 13b, construct (via restriping, and conversion of median) second left-turn lanes on the northbound and southbound approaches to the Century Boulevard/Hawthorne Boulevard/La Brea Boulevard intersection and operate the northbound right-turn with an overlap phase. [MM3.14-2(d)]
- (C) As shown on Exhibit 13c, restripe the westbound West 104th Street approach to Yukon Avenue from its current configuration consisting of a shared left/through/right lane to a revised configuration consisting of a left/through lane and a dedicated right-turn lane. [MM 3.14-2(f)]
- (D) As shown on Exhibit 13d, work with the City of Inglewood and Caltrans to widen the I-105 off-ramp approach to Prairie Avenue to consist of two lefts, a shared left/through/right, and a dedicated right-turn lane. This will require obtaining Caltrans approval and complying with the Caltrans project development process as a local agency-sponsored project. Depending on the complexity and cost of the improvement, this could include (but is not limited to) a cooperative agreement, permit engineering evaluation report, project study report, project report, environmental and engineering studies, project design, construction, etc. [MM 3.14-2(g)]
- (E) As shown on Exhibit 13e, restripe the eastbound approach of Manchester Boulevard at La Brea Avenue to provide a separate right-turn lane, resulting in one left-turn lane, two through lanes and one right-turn lane. [MM3.14-2(h)]
- (F) As shown on Exhibit 13f, restripe the westbound approach of Manchester Boulevard at Crenshaw Boulevard to provide a second left-turn lane, resulting in two left-turn lanes, one through lane and one shared through/right-turn lane. [MM3.14-2(i)]
- (G) As shown on Exhibit 13g, work with the City of Inglewood, the City of Hawthorne and Caltrans to widen the I-105 westbound off-ramp at Crenshaw Boulevard to consist of one left, one left/through, and two right-turn lanes. Replace sign gantry. Modify Caltrans maintained traffic signals. This would require obtaining Caltrans approval and complying with the Caltrans project development process as a local agency-sponsored project. Depending on the complexity and cost of the improvement, this could include (but is not limited to) a cooperative agreement, permit engineering evaluation report, project study report, project report, environmental and engineering studies, project design, construction, etc. [MM3.14-2(j)]
- (H) As shown on Exhibit 13h, work with the City of Hawthorne to remove the median island and restripe the southbound approach of Prairie Avenue at 120th Street to provide a second left-turn lane, resulting in two left-turn lanes, two through lanes and one shared through/right-turn lane. Work includes modification of traffic signals as necessary. [MM 3.14-2(k)]

- (I) As shown on Exhibit 13j, work with the City of Hawthorne to implement a southbound right-turn overlap signal phase at the intersection of Crenshaw Boulevard and 120th Street. [MM 3.14-2(l)]
- (J) As shown on Exhibit 13j, construct a second left-turn lane on southbound La Brea Avenue at Centinela Avenue and implement protected left turns for the northbound and southbound approaches. MM 3.14-2(n)]
- (K) As shown on Exhibit 13k, work with the City of Inglewood and Caltrans to restripe the center lane on the I-405 Northbound Off-Ramp at West Century Boulevard to permit both left and right-turn movements. This would require obtaining Caltrans approval and complying with the Caltrans project development process as a local agency-sponsored project. This could include (but is not limited to) a cooperative agreement, permit engineering evaluation report, project study report, project report, environmental and engineering studies, project design, construction, etc. [MM 3.14-3(c)]
- (L) As shown on Exhibit 13l, work with the City of Inglewood and the City of Los Angeles to remove the median island on the north leg and construct a second left-turn lane on southbound La Cienega Boulevard at Centinela Avenue. If infeasible work to identify a substitute measure in accordance with MM 3.14-3(j), as described in the IBEC MMRP.
- (M) As shown on Exhibit 13m, implement protected or protected/permissive left-turn phasing on northbound and southbound South Prairie Avenue at West 104th Street. [MM 3.14-3(l)]
- (N) Work with the City of Inglewood, the City of Hawthorne and Caltrans to investigate the feasibility of adding a second eastbound left turn lane on 120th Street at the I-105 Eastbound On and Off Ramps within the existing pavement width, and if determined feasible within the existing pavement width, to implement the improvement. [MM 3.14-2(p)]
- (O) Work with the City of Inglewood and the Centinela Hospital Medical Center to develop and implement a local Hospital Access Plan, as described in MM 3.14-14 in the IBEC MMRP. This could include a wayfinding program that includes placement of signage (e.g., blank-out signs, changeable message signs, permanent hospital alternate route signs, etc.) on key arterials that may provide fixed alternate route guidance as well as real-time information regarding major events, or other elements. [MM 3.14-14]
- (P) As shown on Exhibit 13n, restripe the northbound approach of Felton Avenue at West Century Boulevard from a single left-through-right lane to one left/through lane and one right-turn lane. [MM 3.14-17(q)]
- (Q) Retain traffic engineer to work with the City to create traffic signal timing sheets to coordinate City traffic signals and optimize City traffic signal timings to accommodate major event traffic flows. See Fig. 3.14-17 in IBEC EIR for locations. [MM 3.14-3(o)]

- (R) Convert the signal control system at the intersection of South Prairie Avenue and Pincay Drive to provide protected or protected-permissive westbound and eastbound left turn phasing. [MM 3.14-3(e)].
- (S) Widen the east side of South Prairie Avenue to extend the proposed shuttle bus pull-out on the east of South Prairie Avenue to the intersection to serve as an exclusive right turn lane. Additionally, implement a northbound right-turn signal overlap phase. [MM 3.14-3(f)] [See Section 5.1(l) above]
- (T) Widen the east leg crosswalk across West Century Boulevard at South Prairie Avenue to 20 feet. [MM 3.14-13 [See Section 5.1(l) above]
