

Dear Governor Newsom,

I oppose the Clippers arena in Inglewood as the plan stands now, and I hope that you will deny their request for speeding up the process (Clearinghouse Tracking Number 2018021056). One of the biggest considerations in this ability is the reduction of gases from the project, both in our neighborhood and in the larger L.A. area. The Clippers are clearly trying to get away with doing the absolute minimum to reduce gases in our community. But that is the way they have been doing this. They did not meet with us before they announced their project and in the last 2 and ½ years it has been silence. Nothing about how big the project is. Is it 100,000 square feet or 1,000,000 square feet or more. Nothing about how many cars are going to be in the parking structures (which are right next to homes). We have no idea what the answers are. Isn't is kind of important to know this stuff before you say okay?

This is NOT the way to get community support for the arena, and it speaks to the way the Clippers have treated our community from the start. With disrespect.

I oppose the Clippers application for and hope that you will deny it until and unless they meet with the community, develop real plans and programs and agree to increase their commitment to reducing local emissions WITHIN our community.

Thank you for your consideration.

Hello,

I am writing to voice concerns about the proposed Inglewood arena (#2018021056) and the application submitted by "Murphy's Bowl" for streamlining the CEQA process. It was my understanding that this arena would bring NEW jobs to Inglewood, but it seems like the plan is to just move the jobs from one area to another. Plus, these are low-paying concession jobs. Working a few nights a week for minimum wage is not what the law requires.

If this is true, then what are the benefits for us who live in the general area? We will face many drawbacks – pollution, noise, construction, crowds, and insane traffic. But what is the upside? Please remember that many residents do not have the money to attend professional basketball games. And not many of us will get to play basketball so what real jobs are there? Make them tell you what are these big time jobs that can support a family.

This project has failed to live up to one of the main requirements laid out in the law. I know Mr. Ballmer is so rich it won't make a difference what we say. I hope that our new governor DENIES this application.

Thank you. 10213 Doty Ave 90303

424-204-3704

Ezequiel Martinez

Ezequiel Martinez

Estimada oficina del gobernador,

Le escribo para pedirle que rechace la solicitud Centro de baloncesto y entretenimiento, de Inglewood, No. 2018021056.

Este proyecto hace un trabajo muy pobre cuando se trata de emisiones de gases de efecto invernadero. Uno de los principales argumentos a favor de la ley estatal fue que llevaría a los proyectos a realizar inversiones locales para reducir la cantidad de gases de efecto invernadero que emiten. Estas inversiones locales pueden ayudar a las comunidades proporcionando dinero y empleos. Sin embargo, el Centro de Baloncesto y Entretenimiento de Inglewood hace solo lo mínimo para reducir las emisiones de gases de efecto invernadero en el área de Inglewood. Están proporcionando energía solar para nuestros hogares. No. ¿Están ayudando a eliminar nuestros coches de gasolina? No. No están haciendo ninguna inversión real en nuestra comunidad para reducir estos gases. Realmente van a agregar mucho más tráfico y humo de automóviles a nuestra comunidad.

Esto no es lo que los partidarios de la ley anunciaban cuando pedían a las personas que apoyaran la ley.

Murphy's Bowl y los Clippers pueden hacerlo mejor que esto. Ellos están tratando de hacer lo menos posible. Por favor, rechace esta solicitud o hágales hacer cosas reales en nuestra comunidad para que sea mejor para nosotros. Y haga que trabajen con nuestra comunidad antes de aprobar algo. Después de 2 años desde que anunciaron este proyecto, casi no se ha hablado con la comunidad. Todavía no sabemos realmente cuál es el proyecto. Imagínate 2 años y no tenemos ni idea. ¿Por qué? Porque el señor Ballmer sabe que el dinero compra lo que necesita en Sacramento.

Sinceramente,

Janae Clark Janae Clark

(424)227 - 1191

Dear Governor's Office,

I am writing to ask you to turn down the application for the Inglewood Basketball and Entertainment Center, No. 2018021056.

This project does a very poor job when it comes to greenhouse gas emissions. One of the main arguments in favor of the state law was that it would lead projects to make local investments to reduce the amount of greenhouse gas they emit. These local investments can help communities by providing money and jobs. However, the Inglewood Basketball and Entertainment Center does only the bare minimum to reduce greenhouse gas emissions in the Inglewood area. Are they providing solar for our homes. No. Are they helping to remove our gas cars. No. They are not making any real investment in our community to reduce these gases. They are really going to add a lot more traffic and car fumes to our community.

This is not what the supporters of law were advertising when they asked people to support the law.

Murphy's Bowl and the Clippers can do better than this. They are trying to do as little as possible. Please turn down this application or make them do real things in our community to make it better for us. And have them work with our community before you approve anything. After 2 years since they announced this project, there has been almost no talking to the community. We still don't really know what the project is. Imagine 2 years and we have no idea. Why? Because Mr. Ballmer knows that money buys what he needs in Sacramento.

Sincerely,

Jancee Clark

3655 W 105th St

(424) 4227-1191

Dear sir,

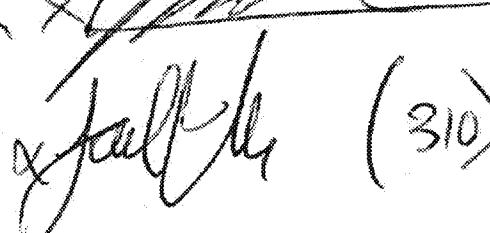

Regarding AB 987 project number 2018021056, I ask that you reject the application for giving away our rights and letting them streamline the Inglewood Basketball and Entertainment Center.

This project is a bait and switch. It was advertised as a great job generator for our community, but it does not comply with the requirement to create high wage, highly skilled jobs that pay a living wage and employ a skilled and trained workforce. Instead, the project will just move mostly low skilled, low paid jobs from L.A. Live to Inglewood. Ninety percent of these jobs will be minimum wage jobs, and it will be the same people doing the jobs and are doing them today. We all know there are part time jobs, hired by a concession company. These are not jobs that can support a family. With all due respect, these are not the jobs our community needs and these are not the jobs we were promised by the sponsors and supporters of the law.

People in the Inglewood area would like to see brand new jobs in specialized fields, such as sports medicine, business management, marketing, and other careers. Unfortunately, those are not the jobs being proposed by the Clippers. They are concession workers, security guards, and cleaning people. And last I checked not many of us qualify for a position on the basketball team. Please make clear that California's laws must be followed and deny this application for a project that falls far short of what we were promised and the legal requirement.

Thank you,

Jemima Urban x 
(310)994-9815

— 3627 W. 104ST #4.

Buen día,

Les escribo hoy porque estoy profundamente preocupado por el proyecto de la cancha de básquetbol en Inglewood (Proyecto # 2018021056). El proyecto no es solo un campo de básquetbol sino muchas otras cosas. Y no tenemos idea de cuán grande es este proyecto.

Me preocupa cómo este proyecto masivo afectará el vecindario y la calidad de vida en general en nuestro pequeño vecindario al lado de este gran proyecto. No somos una comunidad rica y no tenemos los medios para contratar expertos para responder estas preguntas, y los Clippers no están haciendo nada para ayudarnos. De hecho, parece que están tratando de ocultar los impactos dañinos del proyecto.

No hay una descripción en la aplicación acerca de cómo se verá esta enorme instalación, qué tan alta será, cuántos autos vendrán a ella, ni siquiera los metros cuadrados del plan. No creo que sea posible evaluar los impactos de este gran proyecto sin esta información básica. Estoy especialmente preocupado porque este proyecto se ubicará inmediatamente al lado de las casas y apartamentos. Los niños, las personas mayores y otras personas respirarán el humo de miles de automóviles casi todos los días. La idea de que mucha gente vendrá en autobús es una tontería. Hoy tenemos problemas para llegar a nuestros hogares cuando el Forum tiene un concierto. El tráfico está respaldado a lo largo de las praderas y otras calles durante mucho tiempo.

Espero que el Gobernador rechace la solicitud de este proyecto hasta que sepamos más sobre lo que los Clippers están tratando de construir en nuestro vecindario. Por favor asegúrese de que los Clippers respondan estas preguntas. Y danos tiempo para ver las respuestas y hacer preguntas. Vas a afectar nuestros derechos. Con suerte, nos incluirás en ese proceso. Los residentes de nuestro vecindario donde se va a atascar este gran proyecto tienen derecho a saberlo.

Gracias.

JESUS SANTANA

Good day,

I am writing to you today because I am deeply concerned about the basketball arena project in Inglewood (Project # 2018021056). The project is not just a basketball arena but a lot of other things. And we have no idea how big this project is.

I am worried about how this massive project will impact the neighborhood and general quality of life in our little neighborhood right next to this big project. We are not a rich community and we don't have the means to hire experts to answer these questions, and the Clippers are not doing anything to help us. In fact, it looks like they are trying to hide the project's harmful impacts.

There is no description in the application about how this enormous facility will look, how tall it will be, how many cars will come to it, or even the square footage of the plan. I do not think it is possible to assess the impacts of this big project without this basic information. I am especially concerned because this project will be located immediately next to homes and apartments. Children, seniors and others will be breathing fumes from thousands of cars almost every day. The idea that a lot of people will come by buses is silly. Today we have trouble even getting to our homes when the Forum has a concert. Traffic is backed up all along Prairie and other streets for long times.

I hope the Governor will turn down this project's application until we know more about what the Clippers are trying to build in our neighborhood. Please make sure the Clippers answer these questions. And give us time to see the answers and ask questions. You are going to affect our rights. Hopefully, you will include us in that process. The residents of our neighborhood where this big project is going to be stuck have a right to know.

Thank you.

JESUS SANTANA
3608 104 St.
INGLEWOOD CA 90306
TEL 310 6728601

To Whom It May Concern,

I am a resident of Inglewood and I strongly oppose the Clippers application to streamline the environmental process for their new arena (#2018021056). I understand that the application requires the Clippers to explain how they will avoid making traffic worse in Inglewood and that one of their suggestions is to transport people to the new arena by bus.

Anyone who has ever tried to drive around Inglewood before an event at the Forum knows that "bussing people in" would be absolutely no help. Cars cannot even get to the Forum on time. Imaging adding the Clippers and then buses. Common sense says it just won't work. I ask you to come here on a night when the Forum has a major act.

Inglewood is a residential area for the most part -- we do NOT want more traffic!! If the Clippers arena is built there will be three major stadiums in Inglewood. That is too many. Mayor Butts pushed for a rail connection to Inglewood, but the MTA says it would cost close to a billion dollars. Please review that study. The only way to make this work is for a real connection to the arena from the train station. Mr. Ballmer has enough to pay for it.

I believe the Clippers are not meeting the requirements of the law. I hope their application will be rejected until a realistic plan can be created to deal with traffic. And then make them share it with the community. So we can have real ability to be part of the process.

Thank you.

Dear Office of Planning & Research,

I am seriously concerned about the Clippers arena project in Inglewood (#2018021056). I am worried about the impact that ANOTHER huge stadium will have on my neighborhood and do not think the Clippers are serious about helping out the people of this community.

I heard about the measures included in the application to give the Clippers' owner the right to move fast. We know nothing about the project. No one has met with our neighborhood. No one even shared with us their application. We do not think their approach to bringing in new jobs makes any sense. They promise that the arena will bring many new "high wage jobs" to the area. But what's really happening is that the team is just moving jobs and events from Staples Center to Inglewood. Where are the new high wage jobs? Where are the career opportunities? Very few people will be able to support a family on a minimum wage job a few nights a week.

In other words, these are NOT new jobs. And they are generally not "high wage" jobs, either. What a letdown.

Please reject this application.

Thank you for your time.

Manuel Vargas

Soy residente de Inglewood y NO creo que el proyecto del Centro de Baloncesto y Entretenimiento de Inglewood (# 2018021056) deba aprobarse para moverse rápido. Este proyecto se anunció en junio de 2017. ¿Desea saber cuántas reuniones han tenido los Clippers con los residentes que vivirán al lado de este proyecto? Ninguna. No se reunieron con nosotros para compartir la información del proyecto. No hemos visto nada sobre este proyecto.

Tenemos muy poca información sobre esta arena. La aplicación no dice qué tan alta o grande será la arena, cuál será su superficie cuadrada, o cuántos lugares de estacionamiento planean incluir. Tampoco dice nada sobre el ruido que viene de la arena, o las luces. Prácticamente no hay detalles de ningún tipo. Al señor Ballmer no le importamos. Todo lo que quiere es su "hogar" para los Clippers y no le importa cómo está lastimando a nuestros hogares y nuestras familias.

Necesitamos información para entenderla y para asegurarnos de que el proyecto cumpla con los estándares ambientales. La gente del Sr. Ballmer le dijo al estado que este iba a ser el mejor proyecto ambiental de la historia. Y no habría impactos para nuestros niños, adultos mayores y comunidad. Creo que se nos debe esta información, por lo que tenemos una idea de lo que está llegando a nuestra comunidad. Esa información debe ser dada a todos nosotros. Deberíamos ver todo esto antes de que decida acelerar el proceso para un multimillonario. No soy un multimillonario pero espero tener algunos derechos.

Me opongo a este proyecto y creo que será malo para mi familia y nuestra calidad de vida. También me opongo a la aplicación para movernos rápido porque nos deja en la oscuridad sobre lo que realmente se construirá en este vecindario residencial, junto a hogares y personas. Lástima a los Clippers por dejarnos a todos en la oscuridad.

Sinceramente,

Martin Friesen

I am a resident of Inglewood and I do NOT think the Inglewood Basketball and Entertainment Center project (# 2018021056) should be approved for moving fast. This project was announced in June 2017. Do you want to know how many meetings the Clippers have had with us residents who will be next to this project? None. They did not meet with us to share the project information. We have not seen anything about this project.

We have very little information about this arena. The application doesn't say how tall or large the arena will be, what its square footage will be, or how many parking spots they plan to include. It also says nothing about noise to come from the arena, or lights. There are practically no details whatsoever. Mr. Ballmer does not care about us. All he wants is his "home" for the Clippers and he does not care how he is hurting our homes and our families.

We need information to understand it and to be sure that the project meets environmental standards. Mr. Ballmer's people told the state this was going to be the best environmental project ever. And there would be no impacts to our children and seniors and community. I believe we are owed this information so we have an idea of what is coming into our community. That information should be given to all of us. We should see this all before you decide to speed up the process for a billionaire. I am not a billionaire but I hope I have some rights.

I oppose this project and think it will be bad for my family and our quality of life. I also oppose the application for moving fast because it leaves us in the dark about what will actually be constructed in this residential neighborhood, next to homes and people. Shame on the Clippers for leaving us all in the dark.

Sincerely,

Maria J.
Maria Trisoi

A quien corresponda en relación con el proyecto Clippers (2018021056),

Estoy escribiendo esta carta porque tengo muchas serias preocupaciones sobre el nuevo proyecto de arena deportiva de los Clippers que se propone para Inglewood.

Nuestra comunidad se ha quedado en la oscuridad sobre muchos detalles importantes con respecto a este plan. Nadie se ha reunido con nosotros ni nos ha hablado sobre este proyecto, que enviará miles de automóviles a nuestra comunidad y tendrá un gran impacto negativo en nuestro vecindario, donde viven miles de personas. Tenemos muchos niños y personas mayores que viven al lado de este gran proyecto.

Casi no hemos recibido información sobre qué tan grande será, qué tan alto será, qué aspecto tendrá, etc. Nada.

Entiendo que al estado también se le ha proporcionado muy poca información sobre este proyecto. No entiendo cómo puede revisar un proyecto y aprobar una solicitud cuando no conoce los conceptos básicos del proyecto, como su altura, cuántos espacios de estacionamiento tendrá o cualquier información real sobre su diseño. Aunque esta aplicación tiene muchas páginas, no hay suficiente información específica incluida para permitir que el estado apruebe esta solicitud.

Espero que se niegue a aprobar cualquier solicitud relacionada con este proyecto hasta que se proporcione esta información básica.

Sinceramente,

Nicole McAllister 3627 W. 104th St. Apt # 8
Nicole McAllister 323 (432) 7593

To whom it may concern regarding the Clippers project (2018021056),

I am writing this letter because I have many serious concerns about the new Clippers sports arena project that is proposed for Inglewood.

Our community has been left in the dark about many important details regarding this plan. No one has met with us or talked to us about this project, which will send thousands of cars into our community and have a huge negative impact on our neighborhood, where thousands of people live. We have many children and older people living right next door to this massive project.

We have received almost no information about how big it will be, how tall it will be, what it will look like, etc. Nothing.

I understand that the state has also been provided with very little information about this project. I don't understand how you can review a project and approve an application when you don't know the basics about the project, such as how tall will it be, how many parking spaces it will have, or any real information about its design. Even though this application has many pages, there's not nearly enough specific information included to allow the state to approve this application.

I hope you will refuse to approve any applications related to this project until this basic information is provided.

Sincerely,

Nicole McAllister
Nicole McAllister

Public comment on the Inglewood Basketball and Entertainment Center, Number 2018021056

Please make the Clippers start all over on the application for the Inglewood Basketball and Entertainment Center, Number 2018021056. This application has many flaws. It includes very little information about the project, like what it will look like or how many cars it will handle. It also tries to lower greenhouse gas emissions on the cheap, in a way that will not bring much benefit to Inglewood. Also it really doesn't provide real long term good paying jobs for us community folks. Beer and hot dog sellers don't get paid a whole lot.

When the supporters spoke in favor of this law, they focused on all the good things that come with reducing greenhouse gases locally. These supporters said that "mitigation" projects would generate investment dollars and create jobs right here in the Inglewood community.

These projects would have other benefits as well, such as helping residents lower their electricity bills and improving health, such as by planting trees. Instead the Clippers arena want to do as little as they possibly can to meet their requirement to reduce greenhouse gas emissions. It may save them money, but it is not good for Inglewood and it is not the law that we were promised.

Please say NO to this project.

Sincerely, Oral Logan
310 210 4942

Inglewood Ca
90303 Apt 42

A la Oficina de Planificación e Investigación de California,
Rechace la solicitud AB 987 para el Centro de Baloncesto y Entretenimiento
de Inglewood, No. 2018021056. A la aplicación le falta información importante
sobre el proyecto, como:

- ¿Qué tan grande será el proyecto (pies cuadrados, etc.)?
- ¿Qué tan alto será el proyecto?
- ¿Qué tan altos serán los garajes de estacionamiento, que se encuentran en
nuestro vecindario al lado de las casas?
- ¿De qué se construirán la arena y otros edificios?
- ¿Cuánto concreto se va a utilizar?
- ¿Cuántos autos tendrán los garajes de estacionamiento?
- ¿Cómo manejará la comunidad miles de autos adicionales en nuestro
vecindario?

El solicitante de este proyecto, el equipo de baloncesto de los Clippers, se ha
negado a compartir detalles básicos sobre esta propuesta tan importante.
Esta información será muy importante para decidir si el proyecto cumple con
los requisitos de la ley. ¿No deberíamos hablar con nosotros? ¿No
deberíamos estar involucrados en el proceso? ¿Cómo puede alguien
averiguar si el proyecto será respetuoso con el medio ambiente y qué tipo de
impacto tendrá en el vecindario si no se proporcionan detalles?

Por favor, no apresure este proyecto a través. En su lugar, solicite esta
información básica para que usted, y el público, puedan entender realmente
lo que quieren construir en Inglewood. Y asegúrese de que la información
esté disponible para el público, para que todos puedan verla. Y danos tiempo
para revisarlo.

Muchas gracias, Reynol Rodriguez
323-834-1582
3647 W. 104 th St. H6
Reynol Rodriguez

To the California Office of Planning and Research,

Please reject the AB 987 application for the Inglewood Basketball and Entertainment Center, No. 2018021056. The application is missing important information about the project, such as:

- How large the project will be (square footage, etc.)?
- How tall the project will be?
- How tall the parking garages will be, which are located in our neighborhood next to homes?
- What the arena and other buildings will be made of?
- How much concrete is going to be used?
- How many cars the parking garages will hold?
- How the community will handle thousands of additional cars in our neighborhood?

The applicant for this project, the Clippers basketball team, has refused to share basic details about this very important proposal. This information will be very important in deciding whether the project meets the requirements of the law. Shouldn't we be talked to. Shouldn't we be involved in the process? How can anyone figure out whether the project will be environmentally friendly and what kind of impact it will have on the neighborhood if no details are provided?

Please do not rush this project through. Instead, please ask for this basic information so that you, and the public, can really understand what they want to build in Inglewood. And make sure the information is available to the public, so everyone can see it. And give us time to review it.

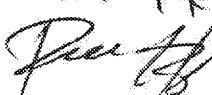

Thank you very much,
Reynol Rodriguez
323-834-1582
3647 W 104th St.
Reynol Rodriguez

To whom it may concern,

I am writing about Project #2018021056, the basketball arena in Inglewood proposed by the L.A. Clippers. This application ignores the spirit of the law by doing as little as possible to lower the emissions of greenhouse gases (GHG) locally, in the Inglewood area.

Lowering GHG can be a big help to a local area. In this case, it should mean that new dollars are spent in the local area, helping businesses and hiring local workers. For example, this could include energy efficiency programs that also help local residents and businesses save money on utility bills. These energy efficiency programs also put people to work, doing things like installing solar panels, retrofitting homes, insulating buildings, etc. But there is none of that.

Instead of these locally programs, the Clippers plan to just write a check to receive many of their GHG reductions. They will look for the cheapest programs around. And we will get nothing. Except lots of traffic and car emissions. This will do nothing to help Inglewood residents or the community, and as I said it ignores the spirit of this law. Please say NO to the Inglewood arena.

Sincerely, 3620 w 102 st #414
323)978-7202
Rosaura Hernandez

AB 987 Application #2018021056

Dear Governor's Office,

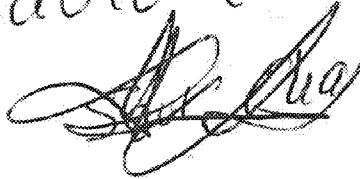

I have many concerns about the Clippers arena project. The biggest, by far, is the impact it will have on local traffic. I was relieved to learn that the new law requires a strong top flight traffic management program that will get cars off the street, but the program proposed by the Clippers doesn't make any sense to me.

The idea that putting thousands of people on buses from transit centers will "solve" the traffic problem is crazy. This idea is especially foolish when you realize the Forum and new NFL stadium will be operating at the same time. If they are all active at the same time, it will be disruptive for residents and unpleasant for everyone. It may also be outright dangerous. Plus, I highly doubt many people going to games and concerts will want to take a train and a bus, which sounds extremely inconvenient. Did the Clippers share with you the studies that transit use is going down in LA? Did the Clippers show you what it is like when the Forum has a big concert? It can take almost an hour to get down Prairie from the freeway.

I strongly oppose this plan and hope the Clippers application to streamline the EIR process is denied.

Saulo E Chan

A quien le interese,

Soy un vecino preocupado y te escribo sobre el proyecto de los Clippers arena en Inglewood (Número de seguimiento 2018021056). Me opongo firmemente a este proyecto por varios motivos, y espero que esta carta sea leída y considerada antes de que el gobernador decida ayudar a los Clippers a quitarnos nuestros derechos y actuar tan rápido. Los Clippers no han proporcionado información a la comunidad. ¿Cómo están los Clippers haciendo esto sin probar toda la información? No se nos ha dado ninguna información. Nada.

Tengo muchas preocupaciones sobre el proyecto y los efectos potencialmente dañinos que tendrá sobre nosotros. Tenemos muchos niños y personas mayores en nuestra comunidad. Sé que la gente pobre parece que no importan. Los multimillonarios ricos importan.

Lo que más me preocupa es lo poco que sabemos sobre el proyecto. Aparte de una ubicación, no he visto ninguna imagen de este gran proyecto, ubicado junto a miles de casas y apartamentos. ¿Alguien te ha dicho cómo será? Que tan alto es. Cuántos carros habrá allí. La aplicación que enviaron los Clippers ni siquiera incluye información sobre el tamaño del proyecto Arena. ¿Cómo puedes entender los impactos si no sabes qué tan grande es?

Creo que esta es información básica que el gobernador y los residentes de la comunidad deberían tener antes de que algo avance con el proyecto. SCARLY NOYDIA (909)454-9792

Mejor,

3647 W. 104th St Apt #2
Inglewood Ca 90303

Scary Noyda

To Whom It May Concern,

I am a concerned neighbor writing to you about the Clippers arena project in Inglewood (Tracking Number 2018021056). I adamantly oppose this project for a number of reasons, and hope this letter is read and considered before the governor decides to help the Clippers take away our rights and move so fast. The Clippers have provided no information to the community. How are the Clippers doing this without proving all the information? There has been no outreach to us. Nothing.

I have many concerns about the project and the potentially harmful effects it will have on us. We have many children and older people in our community. I know that poor people often seem like they don't matter. Rich billionaires matter.

What worries me most is how little we know about the project. Aside from a location, I have not seen any pictures of this huge project, located right next to thousands of homes and apartments. Has anyone told you what it will look like. How tall it is. How many cars will be there. The application the Clippers submitted doesn't even include information about how big the arena project is going to be. How can you understand the impacts if you don't know how big it is?

I feel this is basic information that the governor, and community residents, should have before anything moves forward with the project.

Best, *JAR14 Nocula* (909) 454-9792
3647 W 104ST #2

JAR14 Nocula

Dear sir/madam,

I am writing concerning the Inglewood Basketball and Entertainment Center, Project #2018021056.

Traffic is already a serious problem in Inglewood. Even the city knows it and agrees. The City has said that the area has no transit and traffic is a nightmare. The plan by the Clippers to bring people by buses to come to arena events is not going to happen. The Clippers will do nothing to decrease congestion. We are being sold down the river.

The program proposed by the Clippers is not serious. To be honest, it is a joke. There are no specific promises, and no way to hold the Clippers responsible for its failure.

This is a terrible location for a major new events venue. It is going to increase overall traffic in the area. The rail lines are not located nearby, and very few people will use public transit to get to and from the arena. The Metro agency said it would cost a billion dollars to make a real connection to the transit stations. I would ask you to come to my neighborhood on a night when just the Forum has a major concert and see what traffic is like.

We don't need another sports venue far from a transit stop in Inglewood – just look at the traffic during a Forum concert. And of course this problem will be much worse once the NFL stadium opens. The Clippers don't get much transit usage even at Staples Center in Downtown LA, which has lots of transit.

Please do what's best for Inglewood and Los Angeles and reject this application. Send the Clippers back to the drawing board and come back with a real plan. Look at the Metro Study. Make Mr. Ballmer pay for the real connection to the train station.

Thank you.

Veronica Gannon - 310-904-5668
10317 Yukon Ave Inglewood CA 90303
Veronica Gannon

Querido señor, señora,

Estoy escribiendo sobre el Centro de entretenimiento y baloncesto de Inglewood, Proyecto # 2018021056.

El tráfico ya es un problema grave en Inglewood. Incluso la ciudad lo sabe y está de acuerdo. La Ciudad ha dicho que el área no tiene tránsito y el tráfico es una pesadilla. El plan de los Clippers para llevar a la gente en autobuses a eventos de la arena no va a suceder. Los Clippers no harán nada para disminuir la congestión. Nos están diciendo una gran mentira.

El programa propuesto por los Clippers no es serio. Para ser honesto, es una broma. No hay promesas específicas ni forma de responsabilizar a los Clippers por su fracaso.

Este es un lugar terrible para un nuevo estadio deportivo importante. Va a aumentar el tráfico general en el área. Las líneas de ferrocarril no están ubicadas cerca, y muy pocas personas usarán el transporte público para ir y venir de la arena. La agencia de Metro dijo que costaría mil millones de dólares hacer una conexión real con las estaciones de tránsito. Le pido que venga a mi vecindario en una noche en la que solo el Forum tiene un gran concierto y vea cómo es el tráfico.

No necesitamos otro lugar deportivo lejos de una parada de tránsito en Inglewood, solo mire el tráfico durante un concierto del Foro. Y, por supuesto, este problema será mucho peor una vez que se abra el estadio de la NFL. Los Clippers no tienen mucho uso del transporte, incluso en el Staples Center en el centro de Los Ángeles, que tiene mucho tránsito.

Por favor, haga lo mejor para Inglewood y Los Ángeles y rechace esta solicitud. Envíe a los Clippers al tablero de dibujo y regresa con un plan real. Mira el estudio de metro. Haga que el Sr. Ballmer pague por la conexión real a la estación de tren.

Gracias. *Jeronica Geronim - 310-904-5068*

Jeronica Geronim

Estimado Representante de OPR,

La propuesta de los Clippers de construir un nuevo estadio en Inglewood haría que nuestras calles locales se parecieran a la autopista 405 en hora punta. El impacto en nuestra comunidad será terrible. Piensa sobre esto. El Forum ya hace que el tráfico se detenga en las noches de concierto. Entonces el nuevo estadio Rams tendrá todo tipo de eventos. Hará que el tráfico sea aún peor. Y luego se construirá todo el proyecto del parque de Hollywood que ya está aprobado. Y el tráfico se detendrá por completo. Entonces, ¿cómo llegarán los autobuses de la estación de tren a la arena, al hotel o al edificio médico? Fácil, no lo harán.

Esperaba que los Clippers hubieran desarrollado una solución inteligente para este problema, pero según la aplicación para el Centro de Entrenamiento y Baloncesto de Inglewood (2018021056), parece que no tienen ideas. Están proponiendo un plan que es completamente irrealista. La idea de poner a miles de personas en los autobuses para llegar a la parada de transporte público más cercana es ridícula, especialmente en los días en que el Forum también está activo. Cuando agregas tráfico desde el estadio Rams y Chargers, será simplemente imposible. Además, ¿qué pasará cuando se construya el resto de Hollywood Park?

Entiendo que la MTA emitió un informe que decía que costaría casi \$ 1,000 millones para construir una conexión ferroviaria al área de la arena. ¿Los Clippers compartieron ese estudio contigo? Quizás a Steve Ballmer le gustaría pagar por esta conexión. Tiene muchos billones. No nos hagas sufrir a los residentes por su mala planificación de transporte.

AB 987 exige un estándar más alto. Por favor, no permitas que los Clippers establezcan un terrible precedente al cambiar a nuestra ciudad. Por el bien de Inglewood y el estado de derecho, rechace esta solicitud.

Gracias.

Vidal CAN DO INGLEWOOD.

Dear OPR Representative,

The proposal by the Clippers to build a new arena in Inglewood would make our local streets resemble the 405 freeway at rush hour. The impact on our community will be devastating. Think about this. The Forum already makes traffic come to a stop on concert nights. Then the new Rams stadium will have all kinds of events. It will make traffic even worse. And then the whole Hollywood park project which is already approved will get built. And the traffic will be dead stop. So how will buses get from the rail station to the arena, or hotel, or medical building? Easy – they won't.

I had hoped that the Clippers would have developed a smart solution to this problem, but according to the application for the Inglewood Basketball and Entertainment Center (2018021056) they appear to be out of ideas. They are proposing a plan that is completely unrealistic. The idea of putting thousands of people on buses to get to the nearest transit stop is laughable, especially on days when the Forum is also active. When you add in traffic from the Rams and Chargers stadium, it will be simply impossible. Plus, what will happen when the rest of Hollywood Park is built?

I understand that the MTA issued a report saying it would cost almost \$1 billion to build a rail connection to the arena area. Did the Clippers share that study with you? Perhaps Steve Ballmer would like to pay for this connection. He has lots of billions. Don't make us residents suffer for his bad transportation planning.

AB 987 calls for a higher standard. Please don't allow the Clippers to set a terrible precedent by shortchanging our city. For the good of Inglewood and the rule of law, please reject this application.

Thank you.

To whom it may concern at the Governor's Office of Planning and Research,

When I first heard about the new arena proposed by the Clippers, #2018021056, I was excited. I know that in order to be given the right to be streamlined by the state, the project would need to create new high-paying jobs right here in town. I have family and friends who are looking for career jobs in the Inglewood area, and this project could be just what they were looking for.

However, the AB 987 application submitted by Murphy's Bowl shows that this is not the case. They are not creating a significant number of new jobs at the arena, proposed for the intersection of Prairie and Century. Instead, they will be moving low-paying jobs from Downtown L.A. to Inglewood, a distance of about 10 miles. I don't see anyone new benefitting from the "jobs" this project will supposedly create.

Here in Inglewood, we need jobs better than food service and cleaning jobs. Sweeping the new arena or selling popcorn is not a real career. We need solid, middle-class jobs that will support a family. That is what the streamlining law requires, and unfortunately the Clippers are not delivering. The Clippers are not upholding their end of the bargain, so they do not deserve to be "streamlined."
