

To the Governor's office,

Please reject the Clippers proposal to build their new stadium in Inglewood quicker than expected. The Clippers are not operating with enough transparency to the citizens of the city for them to be granted this luxury.

There has not been enough information about the project provided to us nor to the state of California for this proposal to be approved. The math used in the transportation program cannot be duplicated and we can't figure out whether the construction numbers make sense. Why withhold this information? I read the application, as much as I could in the short amount of time given to read 800 pages before this is decided on. It states that there are going to be three structures now, not two.

It was not even shared with us that the plan was to make two structures. The people of Inglewood need to be informed here. Are these things going to emit exhaust into the homes a block or so away? How about all the dust and pollution that will be created right next to homes during construction. How will that be reduced? You cannot approve an application without the Clippers proving that the emissions will be reduced locally. Inglewood only wants a stadium if we are going to be benefitting from it, and I have no confidence that's the case right now. In fact, from what I can tell, we are going to be significantly hurt by it. Do not approve the proposal in AB 987, project 2018021056.

Best Regards,

Evelyn Ayala

Dear Governor's Office of Planning and Research,

I am a citizen of Inglewood. I have lived here for a long time and care about my community. Because of this, I am asking you to reconsider streamlining Project 2018021056, which is the Inglewood Basketball and Entertainment Center for the Clippers.

I believe that the people in Inglewood have a right to know what is happening in their city. The Clippers have provided **very little** information as to the details of the arena. In the new application they said that there will be three parking structures instead of two parking structures, which I find interesting because I don't remember ever being informed that there will be two structures! Where will they even place these three parking structures?? We need this information to understand how the Clippers determined what the actual number of trips will be.

To make matters worse, how much exhaust from the thousands of cars that use those structures will be inhaled by the people who live right next door? I don't think that this is reasonable. Inglewood residents deserve better than this.

If the Clippers want their project streamlined, then they must provide more information. Right now, it cannot be determined whether this project meets the requirements of AB 987. I implore you to please not streamline this project until all information has been provided to show the project has met the requirements and the public has had sufficient time to review that information.

Thank you,

Brenda D. Atkins

Hello,

I am writing this letter to express my disapproval towards streamlining #2018021056 -- Inglewood Basketball and Entertainment Center.

I do not want this arena going up in my neighborhood. The Clippers and Ballmer do not care about me or my family. They also don't care about following our rules. I read that the Clippers sent over an 800-page document and the residents only had 14 days to review it. That is crazy! The Governor has a rule which says that 30 days should be allotted to review a new application. That document given by the Clippers was so long and had so many changes that it should just be treated as a new application. In fact I read that this "supplemental material" was actually more pages than their original application! I don't think that 14 days is reasonable. It is clear to me that the Clippers just want to skirt the rules. I can't skirt the rules. My friends can't skirt the rules. Steve Ballmer shouldn't be allowed to either. NOT fair!

And why would you streamline a project that is going to be harmful to the community. Millions of cars on the road. Traffic, air, and noise pollution. Low wage jobs. There is nothing special about this project that merits streamlining. You send the wrong message if you streamline this project -- there should be real benefits to the community for a project to get special treatment. Otherwise, they should follow the same rules as everyone else. I really hope you reject streamlining the Inglewood Basketball and Entertainment Center.

Sincerely,

TIM GIBSON

Dear sir/madam,

I do not want the Governor's Office to streamline the Clippers application #2018021056 through CEQA.

I don't think that they have provided enough information to adhere to AB 987's strict guidelines. Which is crazy to think about as this project has been worked on for a very long time. I think that frankly, the Clipper's and Steve Ballmer must not care enough about our city to meet the standards and show it to us. If they did, the necessary information would have been released a long time ago. You can't tell from the application how they figured out the impacts and reductions. The residents of Inglewood deserve to know. The Clippers basically say to trust them, but nothing about their interactions with the community thus far has engendered trust and our health is too important to take a wait and see approach. It is simple - if they can't show it, then they shouldn't get the streamlining.

Please care about the city of Inglewood and its residents more than Steve Ballmer. Just because he is a billionaire doesn't mean he shouldn't need to provide basic information for his proposed project. It is ridiculous.

Thanks,

Ernesto R. (2012)

To Whom It May Concern,

I am very worried about the environmental effects of #2018021056 -- The Inglewood Basketball and Entertainment Center. AB 987 requires projects to reduce greenhouse gas emissions for the local area. As far as I can tell, this project will do nothing to reduce GHG and other air pollutants or it may even *increase* GHG and air pollution in Inglewood.

A few local reduction measures listed in the bill are expanded public transit, zero emission buses, improved bike lanes, improving energy efficiency of pre-existing buildings. Zero of these reduction measures are happening in #2018021056. Also, this project is going to increase the number of car trips as compared to Staples. How is that in any way "green?" It isn't. I don't want more cars on our streets nor pollution in the air my kids and I breathe. Add in the football stadium that had no environmental review and we might as well be living next to smoke stacks. We already live downwind from the airport!

The Clippers are trying to do the bare minimum. Steve Ballmer is worth *a lot* of money. If he wanted to do more for the environment and the City of Inglewood, he would. There are plenty of meaningful "green" measures that he can implement in our neighborhood to offset the impacts from his arena. Please consider the environment and quality of life impacts that would arise from this project and do not allow it to be streamlined without those measures. It does not meet the specifications.

Sincerely,

Walter Citizen 3744 W. 102ND ST. 310-961-9345

To Whom it May Concern:

I am greatly concerned about the status of the proposed Clippers arena in Inglewood and the possibility it would qualify for AB 987. I have been following this issue closely and was extremely disheartened to see that the Clippers submitted nearly 800 additional pages of analysis and that the state is only allowing 14 days to review.

800 pages is effectively a new project application (the original application was about 500 pages). How can 14 days possibly be enough time to conduct a comprehensive review? The Governor's own rules say that a new application gets 30 days to review.

This seems to be yet another example of the Clippers receiving special treatment and trying to get around the same rules that everyone else plays by.

Please consider extending the review timeline or putting a hold on this process all together. This is being done under the cloak of secrecy, out of public view with little to no accountability.

Sincerely,

Britany Alexander

To the Governor's Office,

I have lived in Inglewood for a long time. I have seen it get increasingly more crowded and polluted. I am against both of those things. The new Clippers stadium (2018021056) would add to both problems. I do not want it to be streamlined through CEQA.

This project is going to add millions more cars onto our already overcrowded streets. Have you ever driven in Inglewood during major events? It's crazy. Now can you imagine how much worse it's going to get if this new arena gets put in too? Don't forget the football stadium being built right now. I don't want to even imagine it. Not only are the additional cars a nuisance, but also a public health concern. I worry about my kids breathing in all of the extra pollutants this will bring to our city.

In order for a project to meet the requirements of AB 987, it needs to reduce greenhouse gas emissions locally. Bringing more cars to the streets doesn't do that. Also, I have read nothing about anything real and impactful that the Clippers are planning to do to help the environment and our community with this project. It is all for their own gain. Last time I checked, Steve Ballmer is a billionaire. He doesn't need any more help from the City of Inglewood. He can afford to do better by us. I demand that my government hold him responsible for his actions and proposals.

With respect,

David Ross

Dear Governor's Office of Planning and Research,

I believe the City of Inglewood is in dire need of high wage and highly skilled jobs. Our residents deserve better than minimum wage.

2018021056 – Inglewood Basketball and Entertainment Center will not bring these high-quality jobs we are in such need of. Yes, the arena will bring new construction jobs. But I don't really count that because those are all temporary. Not something a resident of Inglewood could have to rely on. And the jobs during events are not enough to support a family.

This lack of jobs means that 2018021056 does not meet the requirements of AB 987. Because of this, please reject the application.

Sincerely,

Dkashi (Dor KANAK)

Hello,

I am a longtime resident of Inglewood and am writing because I am worried about the process by which the Clippers arena is being approved. This feels very fast and out of control. The Clippers took months to more than double the documents in their application, yet the community is getting only 14 days to review the additional materials.

The Clippers, under owner Steve Ballmer, seem to be doing everything they can to avoid discussion of the details of the arena project. We raised lots of questions and concerns. They had to correct information because they were wrong before.

They haven't even responded to requests for basic information, like why local greenhouse gas reductions are not being provided for Inglewood, why there are no highly skilled jobs generated from the project, and details about the traffic management and parking, which seems to be wildly inconsistent from document to document.

The Clippers seem frustrated that we are asking these important questions, but they can make this easier. They can do right by our community and provide the missing local transit to make their project work. They can provide real, local pollution reducing measures.

Our community deserves answers on environmental impacts, details about the plan, and why so few local benefits are included in this project. The last thing that our elected officials should be doing is fast tracking this project under AB 987 when so many questions remain.

Please consider these important issues!

Thank you,

To the California Office of Planning and Research,

I live in Inglewood and am writing to share my concerns about the proposed Clippers stadium and AB 987. We still know very little about the proposed Clippers project in Inglewood. I have scoured media clips and public documents and still don't have basic details about the project – THREE parking structures located right next to residential homes? What are the environmental impacts of placing so much parking near where children and families live? Why aren't real local greenhouse gas reduction measures provided like the law requires? The Clippers instead rely on some flimsy efforts to reduce car trips. But the arena is going to have more car trips than Staples Center. That's an increase, not a reduction.

The residents of Inglewood deserve answers to these very important questions before this arena is approved, let alone fast-tracked by the state.

While Steve Ballmer and the Clippers stand to benefit financially by qualifying for AB 987, the residents of Inglewood stand to lose our health.

Please require them to show the facts before they get the benefits.

Hello,

I am writing to you today concerning AB 987 (project number 2018021056) and ask that you reject the application for streamlining. The supplemental materials submitted this week regarding the arena project in Inglewood do not address many of the chief concerns me and many of my neighbors have with the project and that are needed for you to properly evaluate the application. The Clippers took months to submit hundreds of pages yet there is still no information about basic aspects of the project—like how tall the arena will be.

The supplemental materials do contain additional information about the number of parking structures, but still don't say how many parking spaces are going to be provided. I can't tell how the transportation program is supposed to work without knowing the number of parking spaces. I sincerely hoped that a document containing 800 pages of additional information would help me better understand the proposed arena project and how it meets the requirements for streamlining, but I feel more in the dark than ever. This entire process has been disjointed and lacked the proper transparency. It's not fair to keep a community in the dark about something that could have such a massive impact on Inglewood. The application does not show that this is a leadership project. As my math teacher always said – they need to show their work. You should not certify the project until they do.

Thank you

Marian Faison

Dear Governor Newsom,

I am writing to you today asking that you protect the people of Inglewood and reject the Clippers application to fast-track its arena. Inglewood gets nothing out of this deal and I am deeply concerned about the environmental and health impacts this project will have on the community. I assumed when I heard that the Clippers would be submitting more information about the project that they would include details on how they plan to control the amount of pollution in my community created by the arena, but that did not happen. Frankly the additional materials didn't say much of anything. The Clippers are arguing that this project won't have a negative effect on the environment, but I don't see how that is possible. There is no mention of making the changes or improvements within Inglewood that AB 987 required to offset the emissions generated by the new arena.

I implore you to make the Clippers prove that this arena will meet the environmental requirements that are critical to the wellness of my community and reject their application.

Thank you, # - 57 310-665-9406

To whom it may concern from the Governors office,

The proposed arena in Inglewood (clearinghouse #2018021056) will have a huge impact on our community. Not only will it be the THIRD arena in the area adding to the already bad traffic and high air pollution, the Clippers have not produced any information about how they plan to protect the people that actually live in Inglewood.

They have not offered to expand our public transit systems, or to improve bike lanes or otherwise invest in the community to reduce local pollution in any substantial way. They do not seem to care that our day to day lives will be hugely impacted by a new arena. I do not want to have to move out of my home because I'm worried about pollution and the impacts it may have on my health and I do not want to be trapped by horrible traffic.

The Clippers do not care about Inglewood. They have made that incredibly clear through the vague information provided about the actual arena and unwillingness to commit to local GHG and air pollution reductions that AB 987 required. The Clippers make millions of dollars every game and Steve Ballmer is a billionaire. They could be investing in the community and they aren't. Please reject their application.

Pamela Woods

Dear Office of Planning & Research,

A project of the size and potential impact of the proposed Clippers arena that is seeking to be streamlined should be carefully considered by the government with feedback from the surrounding community. There has been ZERO effort on the part of the Clippers to reach out to the community and provide clarity about the effects the arena would have on us. The application does not provide enough information to show it will meet the AB 987 requirements. This is BASIC information that should be readily available to the community before the project is certified.

I have been incredibly disappointed by this entire process and hope the application to fast-track this arena is rejected.

From,

Veronica Cabrera
3647 W 104th Apt 3
Inglewood CA 90303

(310) 946-2236

To whom it may concern,

I have been following the proposed Clippers arena in Inglewood closely and I was shocked by the amount of new information submitted as supposedly supplemental material this week. There are hundreds of pages here about issues critical to Inglewood and the wellbeing of residents. 14 days is not enough time to look through all of this information. The Clippers took 5 months to put this information together. Why does the community only have 2 weeks to review it? What's the rush?

The law states that there should be 30 days of public comment after a new application is submitted—there is so much additional documentation here it's essentially an entirely new application! I work full time and cannot dedicate all of my time to reviewing this document.

I am writing today to ask you to either extend the public comment period to allow concerned parties to properly review this additional information or deny the application for streamlining.

Thank you.
