

To the State of California Office of Planning and Research,

I am writing today to request that you reject the AB987 application by the Clippers' organization to build their new arena (Project 2018021056) in Inglewood. Considering the medley of issues facing the city of Inglewood at the moment, environmental included, I think the last thing we should be doing is rushing along a project that lacks transparency and accountability for the environmental impact it will surely have. The Clippers promised a number of green upgrades to our community. Where are they? We haven't heard of or seen any sign of the promised new bike lanes, upgraded energy efficiency of certain buildings, nor the zero emissions buses.

Instead of delivering what was promised, we are being taken advantage of by a billionaire trying to cut corners.

The Clippers have not shown our community enough respect here. They shouldn't profit off the people of Inglewood's expense. I urge you to reject this project.

Thank you,

Jonathan Barber

Dear Sir or Madam,

I sincerely hope this reaches someone in Sacramento, for the sake of myself, my neighbors, and the city of Inglewood. My growing concerns about the negative impacts of the new arena for the Los Angeles Clippers have become reality.

I ask you to deny their application for a new arena under AB987. While I have many concerns, the majority regard the environmental impact of the project (project 2018021056). This project adds millions of car trips onto our streets, which will spew massive amounts of pollution, harming our quality of life. The Clippers were supposed to make this a "green" project, yet the number of car trips are even MORE than are currently generated at the Staples Center. Additionally, we were promised a number of green upgrades to the city to offset these car trips, like retrofitting buildings to increase energy efficiency. The Clippers have done nothing of the sort and it doesn't seem to even be on their radar. Moving forward with this project would be injecting our community with harmful pollution. Please reject the application.

Best,

NURA OMTER

Dear California OPR,

I beg of you, reject the Clippers' application under AB 987. The Clippers should *not* be able to expedite their new arena, given their attitude to how it will affect my community.

The Clippers have said there will be a massive spike in traffic resulting from this project, over 3 million trips to be exact. Additionally, the city of Inglewood and the organization have repeatedly said they are not close to providing any sort of feasible traffic mitigations. Then why are we trying to do this thing quicker? It makes no sense frankly. The traffic is horrendous as it is.

They say they will try to counteract this traffic by bussing people from train stations to work on the new stadium. More buses on the streets will *increase* traffic and I guarantee you most people will still opt to drive in their cars rather than take a bus.

The Clippers also say that the project will have more private car trips than at the Staples Center. How on Earth is this ok?

Time after time I have been disappointed with the details of this project. I am greatly concerned for the welfare of my community. Please reject this project application immediately.

Sincerely,

MARIA E Olalde

To the Governor's Office,

I am reaching out in regard to the proposed Clippers Arena in Inglewood (clearinghouse number 2018021056). I strongly believe this project application should be denied on multiple grounds, but my main concern is the negative environmental impact this arena will have on the city of Inglewood. A new arena will bring a huge amount of new construction, foot and car traffic and general pollutants. These are things that accompany any large development and in California are usually mitigated to a certain extent, but somehow, the Clippers are proposing no local greenhouse gas mitigations that would keep the residents of Inglewood safe and healthy.

An arena in a residential area has a huge impact. I do not want to see my neighborhood harmed by this arena. Clearly, they are not concerned for the actual residents of Inglewood and believe they can skate by with the bare minimum. Please reject this application and take a stand for the health and wellbeing of the Inglewood community.

Thank you.

To whom it may concern,

The traffic in Inglewood is already horrible – if the new Clippers arena is approved the residents here will have enormous trouble accessing their own homes on game nights. This is unacceptable and the Clippers plan to deal with the increase in traffic is frankly a joke. Even for someone who does not have an extensive knowledge of city planning or traffic mitigation techniques, it is CLEAR that the plan to deal with the 3.3 MILLION trips that will result from the project is not enough to protect residents.

The Clippers themselves admit that the new arena is far from any public transit, and I do not believe busing people in will do much to ease the gridlock—there will still be large buses on the road. Not to mention what this massive increase in traffic will do to our lungs. An added 3.3 million trips means 3.3 million more tailpipes in Inglewood polluting the air we breathe. There are children and elderly people that will feel the impact of this additional activity almost immediately. I ask you to PLEASE reject the Clippers application (number 2018021056). It's not like they are proposing new affordable housing developments or a hospital – it's a BASKETBALL arena. We do not want it or need it and it will hurt our community.

Thank you for your time.

Hello.

I am appalled by the Clippers proposed plan for a new arena in Inglewood and hope that you will reject their application. The new arena will bring over three million car trips into Inglewood. I cannot even begin to imagine what numbers like this will do to the already horrible traffic we have here.

I also don't understand why anyone thinks it's a good idea to build a GIANT ARENA so far from any public transit and right next to homes.

Inglewood already suffers from far more pollution than most places. The Clippers appear to have no intention of providing local greenhouse gas mitigations to protect Inglewood residents.

This project is detrimental to local residents of Inglewood. I ask that you reject this application.

Thanks.

To the Office of Governor Newsom,

I am reaching out to share my concerns regarding project 2018021056, the Clippers' new stadium, and more specifically their request to expedite construction in my city, Inglewood, via AB 987. I object to this application on the grounds that the Clippers have displayed a shocking lack of transparency regarding the community's concerns with the project. Considering that the Clippers expect to call Inglewood home for years to come, this is especially concerning.

There has been zero response to the critique from the community that there will be no new high-quality jobs provided to Inglewood citizens. By law, this project is required to do so, and ensure such jobs pay a living wage, and that such jobs are permanent. However, it appears that the organization is just moving concession stand jobs and things of that nature from the Staples Center to Inglewood. This is not what we were promised. I have a hard time welcoming the Clippers to Inglewood if this is the kind of relationship they plan to have with their neighbors. A higher level of respect and communication is needed for such a project to move forward. You would be doing your constituents a great disservice if you approve the application. Please deny it.

Sincerely,

RAUL ZAVALA

To whom it may concern,

I write to you today to ask that you please reject the Clippers' project 2018021056. I simply cannot welcome an organization into my neighborhood that cannot deliver on their promises. To start, the agreement for them to build their stadium here was contingent on bringing a number of high-quality jobs to Inglewood citizens. It seems like instead, they are just giving us a chance to park cars and sell cotton candy.

Second, the Clippers promised a number of green upgrades to our city, such as zero emissions buses. Again, nothing on that front. I fear that my city is being conned by a billion-dollar organization. You must reject the bill.

Thank you,

José L. Gonzalez

I grew up in Inglewood. I really care about the city and my neighbors. I am writing today to let you know that I oppose the proposed Clippers arena and ask you to reject its AB 987 application.

I have many concerns about the lack of transparency throughout the entire review process so far. Despite our efforts to learn about basic project details, the community in Inglewood is still completely in the dark about the plan for parking spaces, mitigations for large amounts of pollution caused by the project, and how the Clippers plan to generate high-quality jobs.

Now we have to review hundreds of additional pages of information in 14 days. The Clippers had months to submit that information. Why do we have just 14 days to review it? From what I can tell from a speed-read, there is still not enough information on the project and no real local environmental measures that will work.

It is confounding to me that the state would give this project special treatment while so many questions remain. From what little we do know, this project would devastate the health of the community in Inglewood.

I respectfully request that you deny the application.

Thanks so much,

LAURA LOPEZ

Laura Lopez.

I live close to the proposed site, and I am extremely worried about how this project will impact myself and my neighbors. From my understanding, the Clippers have not provided enough information, including very important details. Our city is already congested with traffic, and it would truly be a bigger nightmare for our streets to be flooded with even more cars attending events at the arena. How many parking spots are being provided for the arena? We still don't know.

The Clippers say there will be about 3.3 million estimated new car trips that will result from this project. Again, where will they all park? I can't even imagine the effect this will have on our air quality and on our traffic. How close will the cars and their exhaust be to our homes? How close will the parking construction be to our homes? How much dust will come on to our properties? How can you approve the fast-tracking if you don't know that information?

More information, more caution, and more respect to my community in the form of transparency by the organization is needed for this project to move forward. It should be halted, not expedited. Please reject the application for AB 987 project 2018021056.

Thank you,

Tiffani Jones

Hello,

I am a resident of Inglewood and will be greatly impacted by the proposed Clippers stadium, which is being considered for AB 987 (project number 2018021056). I care deeply about the health of our community and have grave concerns about this project - and the process.

From what little we know so far, the stadium will wreak havoc on the local environment. Yet, the Clippers have been unwilling to provide mitigations to decrease GHG emissions in our community. This is despite the fact that AB 987 -- the state bill they are seeking to qualify for -- specifically calls for local GHG reductions. Clearly, the Clippers don't care about Inglewood. They care about fast-tracking their arena as cheaply for them as possible no matter the costs to Inglewood families.

Please do the right thing and reject this application.

Sincerely,

Emilia Diobco

I am a resident of Inglewood, CA and I am asking that you deny the Clippers application for AB 987 Project 2018021056.

Steve Ballmer is worth billions of dollars. He has the resources to really help our community and environment if he wanted to. Unfortunately, it is clear he doesn't care about us, the air we breathe, or the environment we live in. It is a real shame. He just wants to do as little as possible to squeak by. He is not adding any local reduction measures emphasized by lawmakers involved in AB 987 like improving energy efficiency in existing buildings or expanding public transit. They haven't even investigated those measures.

I don't want this project to receive any special benefits. Many other people I know don't want it to either. Please do the right thing and reject the application immediately and send a message that no one is above the law.

Respectfully,

Carlos James

I am writing to express my opposition to the proposed Clippers stadium, which is being considered for AB 987 (project 2018021056). This is a grossly inappropriate process for a project with clear negative environmental impacts and so few public benefits.

Projects under AB 987 are supposed to reduce greenhouse gas emissions locally. This project doesn't do that. It will increase greenhouse gas emissions because of all the additional car trips going in and out of our city, with no real mitigations to speak of. The people who will come to the stadium get to leave after the game ends. Those of us who live here don't. We have no choice but to stick around and inhale the exhaust fumes all the cars have left for us in our backyard. It is not fair. It will harm our kids and our quality of life!

Inglewood already experiences excessive pollution by being directly in the flight path to LAX. It is unfair to our community to force even more pollution on us, with no real benefits.

Please reject the application.

Sincerely,

carlos Calero
