Opinion: Can Working Parents Still Teach Their Kids at Home?

As parents, we want the best for our children. We want them to be successful in school and in life. But what if we are working parents? Can we still teach our kids at home? This is a question that many parents are asking. The answer is yes, but it is not always easy. Working parents often have less time to spend with their kids. They may also have less energy to spend on their kids. However, there are ways to make it work. Parents can create a routine for their kids. They can also use technology to help them learn. And they can make the most of the time they do have with their kids.
