Subject: RE: IBEC Viewpoints

Hi guys – just looked at the proposed viewpoints, and wanted to ask about the view from 102nd near Doty. Seems like we were missing a view point of the arena sight from the rear along 102/near Doty? Viewpoint 5 seems to look at the hotel but does not seem like we have a good view of the main arena site from 102. Was there a reason that was not included?

Subject: IBEC Viewpoints

Mindy –

We have identified seven viewpoints for which we think AECOM should prepare photosimulations of the IBEC project. A draft graphic is attached depicting those suggested viewpoint locations and directions. Please note – we know the Notch boundary is incorrect; we just received CAD files from AECOM which we are working with to refine the boundaries on all of our figures, but I wanted to put this viewpoint information in front of you as quickly as we could. The purpose of the photosimulations is to show the character, height, massing of the development from the public realm. Please advise on the number and location of our suggested photosimulation viewpoints. After your approval, we can advise the applicant team of the photosimulation needs. I also anticipate that we'll talk about this topic during our standing call on Monday.

Thanks,
Christina
