Subject: IBEC: Estimated water demand analysis
Attachments: Stetson Water Demand Analysis 5.10.2019.pdf

Hello, Christina, Addie, and Brian,

I am attaching the water demand estimate analysis for the IBEC Project prepared by sponsor's consultant Stetson Engineering.

Please note the following:

1. This report includes an estimate of the "baseline" water demand for the project, against which the water reductions achieved through implementation of measures to achieve LEED Gold certification can be compared. The "Proposed Project" figures in the report represent the estimates of actual demand for the IBEC Project.
2. The report includes an estimate of the water demand for the existing uses on the site. Demand for the warehouse facility located at 3838 W. 102nd Street that was vacant at the time that the NOP was issued in February 2018 is presented as zero.

Please let me know if you have any questions or would like to discuss.

Thanks,
Dennis
