IRRIGATION GUIDELINES FOR THE USE OF RECLAIMED WATER

1. The irrigation installation shall not exceed the height of 6’-0” above grade unless otherwise noted in the plans. All components shall be installed in a manner consistent with the guidelines provided by the IRC, Title 24, and the California Department of Water Resources. Irrigation systems shall be designed to minimize water use and to ensure proper drainage of the irrigation system. Irrigation systems shall conform to the regulations for the construction of irrigation systems in all areas served by the Inland Valley Water District and the accompanying plans and specifications.

2. All irrigation and water line spigots shall be identified within the area of the project shall be fabricated in accordance with IRC regulations and the irrigation specifications.

3. Irrigation controllers shall be utilized for the installation of irrigation systems. The controllers shall be capable of controlling the flow of water from individual sprinkler heads.

4. The irrigation system shall be designed to ensure proper drainage of the irrigation system. Irrigation systems shall conform to the regulations for the construction of irrigation systems in all areas served by the Inland Valley Water District and the accompanying plans and specifications.

5. Irrigation systems shall be designed to minimize water use and to ensure proper drainage of the irrigation system. Irrigation systems shall conform to the regulations for the construction of irrigation systems in all areas served by the Inland Valley Water District and the accompanying plans and specifications.

6. Irrigation systems shall be designed to minimize water use and to ensure proper drainage of the irrigation system. Irrigation systems shall conform to the regulations for the construction of irrigation systems in all areas served by the Inland Valley Water District and the accompanying plans and specifications.

7. Irrigation systems shall be designed to minimize water use and to ensure proper drainage of the irrigation system. Irrigation systems shall conform to the regulations for the construction of irrigation systems in all areas served by the Inland Valley Water District and the accompanying plans and specifications.

8. Irrigation systems shall be designed to minimize water use and to ensure proper drainage of the irrigation system. Irrigation systems shall conform to the regulations for the construction of irrigation systems in all areas served by the Inland Valley Water District and the accompanying plans and specifications.

9. Irrigation systems shall be designed to minimize water use and to ensure proper drainage of the irrigation system. Irrigation systems shall conform to the regulations for the construction of irrigation systems in all areas served by the Inland Valley Water District and the accompanying plans and specifications.

10. Irrigation systems shall be designed to minimize water use and to ensure proper drainage of the irrigation system. Irrigation systems shall conform to the regulations for the construction of irrigation systems in all areas served by the Inland Valley Water District and the accompanying plans and specifications.
