Dennis and Chris – In order to effectively communicate with Golden State Water Company, we need the AutoCAD drawings for the IBEC domestic water infrastructure. Can you please provide that information asap? To transfer the information, you can use our file sharing site: www.deliverit.esassoc.com.

We do have information from the civil engineers that the fire flow will be 4,000 gpm, consistent with the Los Angeles County Fire Department's requirements. All buildings will be sprinklered, per LACFD requirements. Do you have specific test results that demonstrate adequate fire flow?

Thanks for your prompt attention to this.
Christina

Christina,

Nicole at GSWC had additional data needs regarding the project. Please see her email below. Can you help provide these requests?

Thanks,
Maureen

Hello Maureen,

Can you please send over your fire flow requirements and test results? We also need your AutoCAD drawings for this project's domestic water scope. I did not see that in the submittal package that was sent over.

Thank you,
Nicole

Hello Maureen,

Yes, we have received your application along with payment. I will look at everyone's agenda here at Golden State Water in hopes to schedule a meeting that works for everyone. I will be in touch.

Thank you,
Nicole

Mr. Hanford and Ms. Blackburn,

We are the consultants working on the Water Supply Assessment for the new Inglewood Basketball and Entertainment Center. We hope you have received the proper paperwork and payment from the project applicant. Are you available to discuss water supply for the project and any updates to the UWMP this week? We are available anytime Wednesday 2/13 or Thursday 2/14.

Thank you,
Maureen

Good morning,

Before GSWC can discuss this project with you, we need the developer to complete, to the best of their ability as we know the project is in its preliminary stages, a GSWC NB application. This application and the fee of \$2,500 must be returned to GSWC to initiate the project. Nicole can assist you with the completion of our application. Of paramount importance for a project of this size is the determination of the required fire flows and duration as determined by the LA

Co FD. This document is a requirements of submittal of the NB application, and could significantly impact the project schedule if not submitted to GSWC with the completed NB application.

Regards,

Robert

EXTERNAL EMAIL

Mr. Hanford,

We are the consultants working on the Water Supply Assessment for the new Inglewood Basketball and Entertainment Center. Golden State Water Company would be the retailer for the project and we have a lot of questions about the projected water supply for the Southwest System. We have reviewed your UWMP and would like to schedule a conference call to discuss.

Are you available today anytime until 3pm, Wednesday, or Thursday (10am-3pm)?

Thanks,
Maureen
