Subject: IBEC: GSWC

Applicant Team,

As we discovered during our outreach to Golden State Water Company, we need to submit a New Business Application before we can get GSWC meaningfully engaged with us. Therefore, the applicant team must complete, to the best of your ability since we know the project is in its preliminary stages, a GSWC NB application. This application and the fee of \$2,500 must be returned to GSWC to initiate the project on the GSWC side of things. Nicole Blackburn, Nicole.Blackburn@gswater.com, at GSWC can assist you with the completion of the application or answer questions you may have; our team is also available to assist. Of paramount importance for a project of this size is the determination of the required fire flows and duration as determined by the LACoFD; it will be critical that a submission of fire flow information, fire hydrant locations, and other information as specifically outlined on the New Business Application be submitted concurrently with the application. We have been advised that failure of submitting all required documentation with the application may lead to schedule delays. The New Business application is located here: <http://www.gswater.com/download/NEW-BUSINESS-APPLICATION-2017-GSWC-FINAL.pdf>

As soon as the New Business Application, accompanying plans, and check are submitted to GSWC, we will be in a position to engage with GSWC to complete the Water Supply Assessment. Without the New Business Application, GSWC will not talk with us about the WSA or about the project. Please advise this team as soon as you submit the application.

Please let me know if you have questions.

Thanks,
Christina
