

MLO Quick Reference Guide

The Model Lighting Ordinance (MLO) is a guide for environmentally responsible outdoor lighting in North America and is the result of extensive efforts by the International Dark Sky Association (IDA) and the Illuminating Engineering Society of North America (IESNA).

Lighting Zones

LZ0	LZ1	LZ2	LZ3	LZ4
Underdeveloped areas of open space, wilderness park, areas near observatories or areas where protection of a dark environment is critical.	Areas that desire low ambient light levels. Single and two family residential. Rural town centers, commercial areas, business parks with limited night time activity.	Areas with moderate ambient lighting levels. Multifamily residential, hotels, neighborhood business districts, churches, schools, hospitals.	Areas with moderately high lighting levels. Commercial corridors, town centers, mixed use, industrial. Shipping and rail yards. Car dealers, gas stations. High night time activity.	Very high ambient lighting levels. Special cases. Extremely unusual installations. High density entertainment districts and heavy use industrial.

Maximum Allowable Backlight, Uplight and Glare (BUG) Ratings

For bug rating definitions, see BUG Rating Quick Reference Guide on back side.

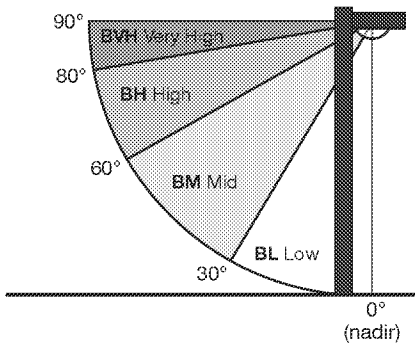

Backlight	LZ0	LZ1	LZ2	LZ3	LZ4
Greater than 2 mounting heights from property line.	B1	B3	B4	B5	B5
1 to less than 2 mounting heights from property line and ideally oriented.	B1	B2	B3	B4	B4
0.5 to 1 mounting heights from property line and ideally oriented.	B0	B1	B2	B3	B3
Less than 0.5 mounting height to property line and properly oriented.	B0	B0	B0	B1	B2
Uplight	LZ0	LZ1	LZ2	LZ3	LZ4
Allowed uplighting rating	U0	U1	U2	U3	U4
Allowed percentage light emission above 90 degrees for street or area lighting.	0%	0%	0%	0%	0%
Glare	LZ0	LZ1	LZ2	LZ3	LZ4
Allowed Glare Rating.	G0	G1	G2	G3	G4
Any luminaire not ideally oriented with 1 to less than 2 mounting heights to any property line of concern.	G0	G0	G1	G1	G2
Any luminaire not ideally oriented with 0.5 to less than 1 mounting heights to any property line of concern.	G0	G0	G0	G1	G1
Any luminaire not ideally oriented with less than 0.5 mounting heights to any property line of concern.	G0	G0	G0	G0	G1

To be considered 'ideally oriented', the luminaire must be mounted with the backlight portion of the light output oriented perpendicular and towards the property line of concern.

The luminaire rating for any one rating is determined by the highest rating in each table.

Example: BH zone is rated B1
 BM zone is rated B2
 BL zone is rated B1
 Luminaire backlight rating is B2
