Dennis, I think Addie tried reaching out to you as well but a question has come up on the Geotech report by AECOM. We were wondering if we could have them double check something.

The report states that the Inglewood fault is 1.13 miles away and yet their Fig. 5 is showing it closer to 0.5 miles. We would like to get them to confirm/clarify the distance to the Inglewood fault.

Thanks

Dennis – wondering if you have time tomorrow to discuss the revised EKI reports and the screening levels tomorrow. I'm available anytime tomorrow. Let me know. I know the team is wanting to move forward with this.

Thanks
